

Parksy.com Arrives on the App Store, Completing Its Free Parking Platform's Rollout Across Both Major Mobile Ecosystems

Parksy (parksy.com) brings its free, commission-free parking marketplace to iOS, giving drivers the same tools already live on Android.

NEW YORK, NY, UNITED STATES, August 30, 2026 /EINPresswire.com/ -- Parksy (parksy.com), the free, commission-free parking marketplace, is now live on the Apple App Store, joining its existing Android release and putting the platform on both major mobile ecosystems for the first time. The [iOS](#)

[app](#) is available at

<https://apps.apple.com/us/app/parksy-parking-made-easy/id6764472718> and the [Android app](#) at <https://play.google.com/store/apps/details?id=com.parksy.app>.

Commision free car parking spaces in a commercial garage

The launch completes a deliberate sequence. Parksy built its marketplace on the web first, added Android once the model had proven itself across 57 countries, and has now brought the same platform to iPhone — the same listings, the same free tools, and the same pricing on every surface, which is to say none. Finding parking is free. Listing a space is free. There is no commission in the funnel anywhere, on any platform.

“

A parking spot rental was never a lease. iOS users can now search, book and appeal fines for free, same as everyone on Android.”

Daniel Battaglia

For industry watchers, the interesting part is what the app does not contain. There is no booking-fee line item, no

service charge, and no percentage taken from space owners — the revenue mechanics that define most of the category. Founder Daniel Battaglia regards that absence as the product. "Cross-platform parity usually means the fees follow you from one store to the other. Ours is the boring kind of parity: the app is free on Android, free on iOS, and free of surprises on both."

The iOS release carries the full toolset Parksy has been assembling for drivers: search and booking across more than 108,000 listed spaces worldwide, the AI-powered fine appeal calculator, a parking sign scanner, a find-my-parked-car tool, and a roadside accident report that works without signal. Most tools require no signup at all.

For space owners, the app extends the listing side of the marketplace — [driveways, garages and unused spots](#) — with no lease paperwork and no cut taken, consistent with the platform's model since 2011.

"Fifteen years in, being on both app stores is less a milestone than a housekeeping item," Battaglia said. "The milestone is doing it without ever charging a driver to be introduced to a parking space. That part we are proud of."

About Parksy

Parksy (parksy.com) is a free, commission-free parking marketplace operating across 57 countries. Drivers use Parksy to find and book parking, appeal unfair fines with a free AI-powered calculator, scan confusing signage, locate a parked car, and report accidents — all at no cost and with no signup required for most tools. Space owners list and rent out driveways, garages and unused spots for free, with no commission and no lease paperwork. Parksy was founded in 2011 by Daniel Battaglia and is headquartered in Sydney, Australia.
