

Tanyu Launches the World's First Wall and Floor Printer with Fluorescent Printing Effects

Tanyu's TWF1000 wall and floor printer with fluorescent ink offers impactful visuals for wall/floor printing and commercial, brand, creative projects.

FL, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- Tanyu has officially launched the fluorescent [TWF1000 wall and floor printer](#). As a machine designed for wall printing, floor printing, and multi-material printing applications, the TWF1000 now adds fluorescent printing effects to its existing wall and floor printing capabilities, creating a new application direction for the wall printing business.

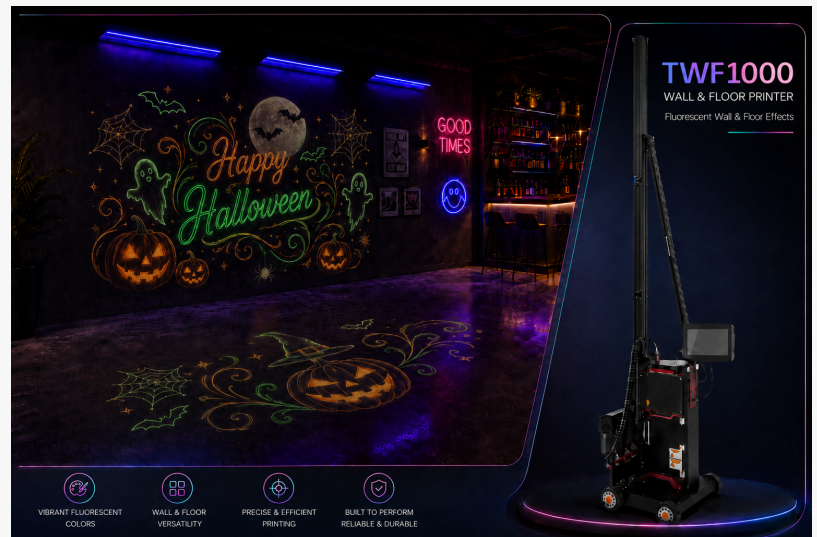

The newly released fluorescent TWF1000 marks an important upgrade in Tanyu's wall printing technology and commercial space printing applications. In addition to standard CMYK color printing and white ink printing, it can also output fluorescent colors, allowing printed graphics to appear more eye-catching and memorable under specific lighting conditions.

Market Demand Drives Fluorescent Wall Printing Applications

As commercial spaces place greater emphasis on visual experience, brand stores, restaurants, cafés, bars, exhibitions, events, and themed spaces no longer need only basic

Fluorescent effect patterns printed in a bar using the Tanyu Fluorescent TWF1000 wall and floor printer.

wall decoration.They now pay more attention to space recognition,photo-sharing value,and on-site experience.

The fluorescent TWF1000 was developed in response to this demand.It can create fluorescent visual effects on walls,floors,and selected material surfaces,helping users produce brand logos,themed graphics,event backdrops,floor wayfinding graphics,and creative display content.

With fluorescent effects,wall printing projects can move beyond standard graphic output and further extend into commercial space visual design,giving wall printing service providers more differentiated project options.

Showcasing the reasons for the fluorescent effect printed with the TWF1000 wall and floor printer

TWF1000 Upgrade:Combining Wall and Floor Printing with Fluorescent Printing

The TWF1000 is a wall and floor printer developed by Tanyu.It supports wall printing,floor printing,and customized printing on various material surfaces.With the new fluorescent version,the TWF1000 adds fluorescent printing capability to its existing applications,allowing users to take on more special visual-effect projects.

Fluorescent printing is not simply about adding one more color.It requires the printhead,ink system,spot color channel setup,and printing parameters to work together.

The fluorescent TWF1000 uses an Epson I3200 printhead and supports CMYK,white ink,and fluorescent color output.Through its multi-channel printing system,the machine can complete standard color printing,white ink-assisted printing,and fluorescent-effect printing according to different designs and application scenarios.

On standard materials,users can combine color graphics with fluorescent colors to enhance local visual effects.On dark walls,white ink can be used as a base layer to help color and fluorescent effects appear more clearly.On high-transparency PVC,acrylic,and similar materials,reverse printing can also be used according to project needs to create a better display effect.

Expanding Wall Printing Business into More Commercial Scenarios

Tanyu has long focused on the research,development,and manufacturing of wall printers and wall and floor printers.Its customers include wall printing entrepreneurs,advertising

companies,decoration companies,commercial space design teams,and local printing service providers.

The launch of the fluorescent TWF1000 wall and floor printer means that wall and floor printing equipment can move beyond standard space decoration and further expand into brand visuals,event displays,night-time spaces,themed environments,and creative custom projects.

Through this new machine,Tanyu aims to help users combine digital graphics,fluorescent effects,and commercial space needs,providing customers with more differentiated wall and floor printing services.

About Tanyu

Tanyu is a brand focused on the research,development,and manufacturing of wall printers and wall and floor printers.The company provides global customers with wall printers,wall and floor printers,accessories,and related application solutions.

Tanyu's full range of [wall printer](#) products can be used for residential walls,commercial spaces,brand stores,exhibitions and events,decorative materials,and various customized printing scenarios.

In addition to wall printer equipment,Tanyu also provides installation guidance,software training,image processing advice,printing material library support,daily maintenance guidance,and after-sales technical service to help customers build and operate their wall printing business more steadily.
