

TuxCare Senior Developer Advocate To Speak at Commit Your Code 2026

PALO ALTO, CA, UNITED STATES, August 31, 2026 /EINPresswire.com/ --

[TuxCare](#), a global innovator in securing open source, today announced that Chris DeMars, Senior Developer Advocate, is slated to speak at [Commit Your Code](#) 2026, a Texas Web Development conference taking place September 3-4 at the Capitol One Campus in Plano, Texas.

At 2 p.m. on Friday, September 4, Chris is set to present a talk titled, "The node_modules Iceberg: Mysteries Below the Waterline." The session will discuss the often-overlooked world of transitive dependencies and the risks they can introduce into modern software environments.

Attendees will learn what transitive dependencies are, how to identify and inventory them, and why understanding the packages beneath the surface is critical to managing software supply chain risk. The presentation will also cover practical approaches for addressing vulnerable or end-of-life dependencies, including how extended lifecycle support solutions such as TuxCare's ELS can help organizations maintain components that cannot be easily upgraded or replaced.

For more information on the session, visit <https://www.commityourcode.com/speakers/chris-demars>

Chris DeMars serves as TuxCare's Senior Developer Advocate where he focuses on secure JavaScript development and software supply chain education. With more than 20 years of experience in web development and developer relations, Chris is a recognized Google Developer Expert and Microsoft MVP – best known for his work in web accessibility, secure frontend practices, and community building. Based in Detroit, he brings both technical expertise and a passion for inclusive, developer-first communities to every stage he steps on.

TuxCare will also exhibit at the show. For detailed information on the Commit Your Code 2026 event, visit <https://www.commityourcode.com>.

About TuxCare

TuxCare is on a mission to reduce the risk of cyber exploitation while making it easier for enterprises to get the most from their open-source technologies. Through its automated rebootless vulnerability patching solutions, end-of-life security offerings, and enterprise-grade support for AlmaLinux, TuxCare empowers thousands of organizations to protect themselves while leveraging the most advanced enterprise security solutions on the market today. The world's largest enterprises, government agencies, service providers, universities, and research institutions are protected by TuxCare on over one million workloads and growing.
