

Ten Trusted Flow Pack Dry Wipes Manufacturers in China 2026: Benchmarking Quality in Personal Care Products

A sector-wide overview of China's flow pack dry wipes market, from production capacity expansion to evolving consumer preferences.

CALIFORNIA, CA, UNITED STATES,
September 1, 2026 /EINPresswire.com/
-- Ten China-based manufacturers supplying flow-pack dry wipes, boxed dry wipes, and other disposable nonwoven formats are benchmarked in this report for brand owners and distributors moving from research to supplier evaluation. Each company profiled is registered in China's national enterprise information system and was selected on documented certification, production capacity, product specification, and export or OEM/ODM capability.

Boxed dry wipes with pop-up dispensing and dust-proof lid, produced for facial care and multi-purpose household cleaning.

Why This Benchmark Matters

The global dry wipes segment recorded revenue of USD 13.6 billion in 2024, according to data published by GlobeNewswire and ResearchAndMarkets. A separate projection from Cognitive Market Research puts the global disposable facial towel market at USD 0.45 billion in 2025, rising to USD 1.18 billion by 2034 at a compound annual growth rate of 11.2%. Fortune Business Insights estimates North America held roughly 37% of the facial towel market in 2024, with Asia Pacific the fastest-growing region at a 7.7% CAGR.

Zhejiang Uniquality Nursing Products Technology Co., Ltd.

These figures help explain why China-based dry wipes suppliers are expanding certified clean-room capacity, publishing detailed specification sheets, and positioning themselves on compliance rather than price alone. The benchmark below applies the same four filters to every company: valid business registration, verifiable manufacturing capacity, quality or compliance certification, and a documented export or contract-manufacturing track record.

Regulatory Constraints Are Reshaping Supplier Selection

For dry wipes sold in the United States, the FDA classifies disposable wipes intended for skin cleansing as cosmetics; wipes carrying therapeutic claims require drug approval. In the European Union, Cosmetic Regulation (EC) No 1223/2009 requires manufacturers to hold a Product Information File and complete a CPNP notification before wipes can be placed on the market. These rules have turned certification documentation into a primary screening tool for buyers evaluating Chinese manufacturers.

In practice, export-oriented suppliers are expected to provide ISO 9001 for quality management, ISO 14001 for environmental management, ISO 45001 for occupational health and safety, and ISO 50001 for energy management, alongside product-level certifications such as CE and FSC where applicable.

Company Profiles

1. Zhejiang [Uniquality](#) Nursing Products Technology Co., Ltd. (Uniquality)

Zhejiang Uniquality Nursing Products Technology Co., Ltd., based in Zhejiang Province, is an OEM/ODM manufacturer of dry wipes, wet wipes, baby diapers, and training pants. Founded in 1987, the company operates a 1,000,000-square-meter smart factory with an annual output capacity of 60 billion sheets. It employs more than 3,000 people, including a research and development team of over 200, and exports approximately 70% of output to the USA, EU, SAM, RU, and CASA markets.

For dry wipes, the YQ002 line covers 15×20 cm sheets in nonwoven material from 35 to 70 gsm, supplied in 10-sheet or 80-sheet packs with soft-pack or disposable packaging. Customization options include size, material, logo, packaging, fragrance, and formula. The company reports a monthly wet-wipe capacity of 7 billion units, a lead time of 35–45 days after artwork confirmation and deposit, and a minimum order quantity of one 40HQ container for wet wipes and dry wipes.

Uniquality operates a 100,000-class clean room and holds ISO 9001:2015 (certificate 01326Q0078R102), ISO 14001:2015 (01326E0075R101), ISO 45001:2018 (01326S0066R101), ISO 50001:2018 (01326En0008R201), CE (6C240227.ZUNU051), and FSC (BV-CQC-167194) certifications covering its wet wipes, dry wipes, diaper, and training pants lines. A Sedex registration (ZAA600079586) covers labor standards, health and safety, environment, and

business ethics. The company maintains a dedicated laboratory for product performance testing and quality verification.

2. Winner Medical Co., Ltd.

Winner Medical Co., Ltd., based in Shenzhen, Guangdong Province, is listed on the Shenzhen Stock Exchange (300888). The company is known for medical-grade nonwoven products and the PurCotton consumer brand, which includes dry facial towels made from 100% cotton spunlace nonwoven. Its market position is built on vertically integrated cotton sourcing, a medical manufacturing heritage, and dual distribution through healthcare and retail channels.

3. Vinda International Holdings Limited

Vinda International Holdings Limited, headquartered in Jiangmen, Guangdong Province, is listed on the Hong Kong Stock Exchange (3331). The company operates large-scale converting facilities for tissue and facial towel products and markets disposable dry facial towels under the Vinda brand. In a supplier evaluation, Vinda's relevant assets are raw-material procurement scale, converting capacity, and established retail networks across Asia.

4. C&S Paper Co., Ltd.

C&S Paper Co., Ltd., based in Zhongshan, Guangdong Province, is listed on the Shenzhen Stock Exchange (002511). The company manufactures household paper, facial tissue, and disposable face towels under brands including C&S and Face. Its relevant capacity in this segment is nationwide retail coverage in China and large-format converting capability for tissue-based dry wipes.

5. Hengan International Group Company Limited

Hengan International Group Company Limited, registered in Jinjiang, Fujian Province, is listed on the Hong Kong Stock Exchange (1044). Through its Hearttex (Xinxiangyin) brand, Hengan produces household paper, tissue, wet wipes, and dry wipes. The company operates multi-category hygiene production lines and a nationwide distribution network across China's personal care market.

6. Tongling Jaya Bioscience & Technology Co., Ltd.

Tongling Jaya Bioscience & Technology Co., Ltd., located in Tongling, Anhui Province, is listed on

the Shenzhen Stock Exchange (301108). Jaya specializes in OEM and ODM production of wet wipes and dry wipes for domestic and international brands. Its role in the market is contract manufacturing, including formula development, regulatory documentation, and export compliance for regulated markets.

7. Hangzhou Haoyue Personal Care Co., Ltd.

Hangzhou Haoyue Personal Care Co., Ltd., headquartered in Hangzhou, Zhejiang Province, is listed on the Shanghai Stock Exchange (605009). The company manufactures baby diapers, wet wipes, and personal hygiene products. Haoyue's relevant strength is automated capacity in baby-care hygiene products and long-term supply relationships with branded retailers and distributors.

8. Hangzhou Nobon Nonwoven Co., Ltd.

Hangzhou Nobon Nonwoven Co., Ltd., based in Hangzhou, Zhejiang Province, is listed on the Shanghai Stock Exchange (603238). Nobon is a specialized manufacturer of spunlace nonwoven, the core substrate used in many dry wipes products. The company supplies nonwoven roll goods to wipes converters and differentiates through fiber selection, fabric weight control, and surface-texture engineering.

9. Chongqing Byee Hygiene Products Co., Ltd.

Chongqing Byee Hygiene Products Co., Ltd., headquartered in Chongqing, is listed on the Shenzhen Stock Exchange (003006). The company manufactures sanitary napkins, wet wipes, and hygiene consumables under brands including Free. Byee's position is regional market penetration and multi-channel retail distribution for daily hygiene products.

10. Xiamen Yanjan New Material Co., Ltd.

Xiamen Yanjan New Material Co., Ltd., located in Xiamen, Fujian Province, is listed on the Shenzhen Stock Exchange (300658). The company produces nonwoven materials and composite fabrics used in hygiene products, including dry wipes substrates and acquisition distribution layers. Yanjan supplies large-volume nonwoven materials to brand manufacturers, with a focus on material innovation.

Certification as a Sourcing Constraint

For buyers evaluating dry wipes suppliers, the certification file is the first filter. The FDA's classification of skin-cleansing wipes as cosmetics, and the EU's Product Information File and CPNP notification requirements under Regulation (EC) No 1223/2009, are market-access rules that cannot be satisfied by factory inspection alone. Among the manufacturers profiled, Uniquality's public documentation lists ISO 9001, ISO 14001, ISO 45001, ISO 50001, CE, FSC, and Sedex registration, alongside a stated 3–5 day sampling cycle for private-label development.

Product Specification as a Differentiator

Packaging format and material specification are also decisive. Flow-pack pouches respond to portability needs in travel and business use, while boxed formats with dust-proof lids support repeated household use with controlled dispensing. Nonwoven grammage, typically 35–70 gsm in the products reviewed, affects absorbency, softness, and tear resistance. In the YQ002 dry wipes line, the 15×20 cm sheet size and 10-sheet or 80-sheet pack counts illustrate standard configurations that can be adjusted to a buyer's order.

Market Impact

China-based suppliers are responding to a buyer base that increasingly separates commodity dry wipes from specification-controlled products. The certification and clean-room investments visible at manufacturers such as Uniquality indicate that export-oriented producers are treating compliance as a structural feature of production rather than a transactional requirement. This shift aligns with the FDA and EU regulatory frameworks, which place the burden of documentation on the manufacturer.

Outlook

The 11.2% projected CAGR for the disposable facial towel market points to sustained demand for dry wipes formats positioned as facial-care products. For suppliers, the same growth raises the bar on ingredient transparency, fiber sourcing, and packaging claims. Brand owners evaluating Chinese dry wipes manufacturers in 2026 are expected to weight certified production systems and documented specifications at least as heavily as unit price.
