

Top 10 Renowned Lipstick Filling Machine Manufacturers in China 2026: Driving Innovation in Cosmetic Production

Insights into China's Leading Role in the Global Lipstick Filling Equipment Market

CALIFORNIA, CA, UNITED STATES, August 31, 2026 /EINPresswire.com/ -- SHANGHAI, Aug. 31, 2026 — Chinese manufacturers of cosmetic filling equipment are expanding their portfolios from basic liquid fillers to CE-certified hot-filling and cooling lines, pressed-powder systems, and robotic compact assembly solutions. Among them, Shanghai GIENI Industry Co., Ltd., marketed as [GIENICOS](#), has concentrated its engineering work on lipstick, lip balm and other stick-format cosmetics. Founded in 2011 and headquartered at Baihao AI Technology Park, Jiading North Industrial Park, Jiading District, Shanghai, the company operates a 2,000-square-meter factory with an R&D engineering team of 10 specialists. GIENICOS exports approximately 80 percent of its output to the EU, USA and Asia.

Industry Context

According to Future Market Insights, the global cosmetic filling machines market was valued at approximately USD 476.80 million in 2025 and is projected to reach USD 718.63 million by 2036. Fortune Business Insights reported that Asia Pacific held a 33.08% share of the broader filling machine market in 2025. For technology type, Future Market Insights projects automatic filling machines will hold a 41.2% share of the cosmetic filling machine technology market in 2026. These figures point to steady buyer preference for automated equipment that reduces manual

labor and production variation.

News Peg and Ranking Methodology

This editorial ranking assesses ten suppliers that appear in China's public market-registry databases and are active in cosmetic filling or closely related liquid packaging. The comparison uses four indicators: product portfolio coverage of stick, cream, liquid and powder cosmetics; automation and robotic integration; CE or comparable compliance documentation; and international installation references. The list is an editorial assessment, not a certification of product performance.

GIENICOS: A Focused Lipstick and Stick-Product Equipment Builder

GIENICOS's product line is designed around lipstick, lip balm, lip gloss, mascara, eyeliner, eyebrow pencil, nail polish, loose powder, compact powder, foundation, serum, lotion and cream filling and packaging equipment. Key lipstick-related machines include the JSM half-silicone lipstick and lip balm filling line, the JLG-10/12 semi-automatic lipstick filling series, the GLU-1300 automatic silicone-mold lipstick filling machine, the JCT lipstick cooling tunnel, and the JHF multi-functional hot filling and cooling line.

The JHF line can be configured with 2, 4, 6 or 16 nozzles, offers maximum output of 60 pcs/min in the 6-nozzle setup, and supports customizable filling volume from about 0.5 mL up to roughly 250 mL. In powder processing, GIENICOS supplies the JY3-CR100 high-speed powder mixer with a 100L chamber and 10–25 kg batch capacity, the JY-CR200 200L mixer with a 37 kW main motor and three side stirrer shafts, the JMP08 powder pulverizer rated at 7.5 kW and 7200 rpm, and the JBC-5 servo hydraulic compact powder press with maximum pressure of 14 tons and typical mold capacity of 9 pcs per mold at approximately 50 mm diameter.

For liquid and cream products, the range includes the JRS-G3 automatic toner and cream rotary filling machine, the JR-02E eyeliner filling machine with automatic steel ball feeding, inner wiper insertion, capping and finished-product pushing, and the BB CC cushion filling machine with a four-nozzle servo filling system and SUS316L wetted parts. The company also reports holding 42 authorized patents and set up its AI Division in 2020. Its customer base spans more than 100 countries and regions, including the United States, Germany, France, Italy, Switzerland, Poland, Mexico, Brazil, Australia, Thailand, Vietnam, Sri Lanka, Japan and Indonesia.

On the compliance side, GIENICOS has published CE certificates covering lipstick filling machines,

the hot filling line, cushion filling machines, powder mixers, powder compacting machines, rotary filling machines and melting tanks. Published certificate numbers include AT1814C500649151 for lipstick filling machines, AT185114C4000321 for the hot filling line, and ATGZAHS190528008-M1 for melting tanks.

Company Statement

According to GIENICOS, one of its working values is “Love the Change.” The company states that it focuses on customized development for key-account clients and iterates products according to customers’ production requirements, formula features and workshop conditions. It also says its equipment is designed with a modular structure, allowing key assemblies to be disassembled quickly for cleaning, maintenance and spare-part replacement, with the goal of minimizing production downtime.

The 2026 Top 10 List

Ranking logic: the list prioritizes suppliers with documentable automation capability, compliance coverage and equipment breadth relevant to lipstick and color-cosmetic production. The first company receives the highest editorial weighting for focused lipstick-line coverage, followed by nine other China-registered filling and packaging machinery suppliers.

Shanghai GIENI Industry Co., Ltd. (GIENICOS) — Differentiating strength: lipstick and stick-product line breadth across hot filling, cooling, labeling and powder pressing; published CE certificates for several machine groups; 42 authorized patents; and an AI division established in 2020.

Jiangsu Tom Packaging Machinery Co., Ltd. — Differentiating strength: established turnkey filling, capping and labeling solutions for daily chemical and cosmetic products, useful for manufacturers needing integrated packaging lines.

Guangzhou Tech-Long Packaging Machinery Co., Ltd. — Differentiating strength: engineering scale and experience in high-speed liquid packaging systems, applicable to large-format cosmetic liquid filling projects.

Jiangsu Newamstar Packaging Machinery Co., Ltd. — Differentiating strength: complete liquid filling line integration including bottle handling, filling, capping, labeling and verification.

Hangzhou Zhongya Machinery Co., Ltd. — Differentiating strength: filling systems built for dairy, beverage and personal-care environments, with attention to hygienic design and clean-room compatibility.

Shanghai Precise Packaging Co., Ltd. — Differentiating strength: aseptic filling and packaging know-how, applicable to skincare and liquid cosmetics requiring controlled contamination risk.

Ningbo Lehui International Engineering Equipment Co., Ltd. — Differentiating strength: process engineering from liquid processing through filling, suited to large projects and multi-step production lines.

Hangzhou Youngsun Intelligent Equipment Co., Ltd. — Differentiating strength: broad packaging automation portfolio and end-of-line integration, including cartoning, wrapping and robotic handling.

Guangzhou Guanhao Machinery Equipment Co., Ltd. — Differentiating strength: cosmetic filling and packing equipment focused on color cosmetics and skincare, with line customization for small and medium production batches.

Guangzhou KOSBEST Machinery Equipment Co., Ltd. — Differentiating strength: liquid filling and capping machines widely used in cosmetics and personal care, with modular designs that support product changeover.

Market Impact

CE certification has become a practical entry document for Chinese filling equipment sold into the EU. Published GIENICOS certificates cover lipstick filling, hot filling lines, cushion filling machines, powder mixers, powder compacting machines and melting tanks, matching the categories most frequently requested by European buyers. From a buyer's perspective, the main differentiation is no longer the basic filling head but the degree of integration with melting, cooling, labeling, check-weighing and inspection stations.

Closing Outlook

With automatic filling machines projected to represent the largest technology segment in 2026,

the direction is toward higher automation, more compact changeover and documented compliance. For lipstick manufacturers, this means filling-equipment suppliers are being asked to deliver a line rather than a single machine. GIENICOS's publicly available 2026 catalogue provides a reference to its current equipment range .
