SEO FOR CPA & ACCOUNTING FIRMS NATIONWIDE

VERADALE, WA, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- [SEOfor.Accountants](https://www.seofor.accountants/), a specialist accountant SEO agency for CPA and accounting firms, has officially launched at <https://www.seofor.accountants/>. The new SEO agency for accountants provides accountant SEO, local SEO for accountants, and CPA SEO to established accounting practices nationwide, helping firms get found by the clients they actually want.

Founded by Tom Flann, who has delivered SEO services since 2013, SEOfor.Accountants offers SEO for accountants as a dedicated specialty rather than one service among many. "Most agencies that claim to do SEO for accounting firms also do SEO for dentists, plumbers, and everyone else," said Flann, founder and lead strategist. "We only do accountant SEO. Because SEO for CPA firms is all we work on, we already know how accounting clients search, where the ranking opportunities are in a given market, and how to turn a search into a real, high-value engagement instead of another cheap 1040."

Local SEO for accountants sits at the center of the offering. SEOfor.Accountants rebuilds the pages that bring in work so they convert, launches city and service pages that rank in the smaller, lower-competition markets a firm can win, and works to claim the Google Maps local pack in the areas a practice serves. This local SEO for accountants also extends into AI search: the agency positions client firms to be named when prospects ask ChatGPT, Gemini, and Google's AI Overviews for a CPA – part of the same foundation, not a separate product.

As an SEO agency for accountants, SEOfor.Accountants is built to be owner-led and accountable. SEO services for accountants are run like a project rather than a retainer that quietly drifts, with no junior hand-offs, no account managers, and reporting that ties the work back to booked business. The firm delivers SEO for accounting firms of single and multiple offices, Google Business Profile optimization, and website rebuilds when the current site is the bottleneck.

The accountant SEO approach has already produced early results. One client, Kane Tax &

Accounting, went from roughly 40 website visitors a month to close to 200 in the first month after launch and booked \$25,250 in new work that month – driven by city pages ranking in lower-competition markets while authority was built toward the firm’s primary market.

SEOfor.Accountants offers Local SEO services for accountants, CPA firms, and accounting practices of every size, nationwide. Established bookkeeping firms are also considered when the engagement is a fit. Accounting and CPA firm owners can learn more or book a consultation at <https://www.seofor.accountants/>
