

Onsera Health Appoints Sona Chandra as Chief Product & Technology Officer

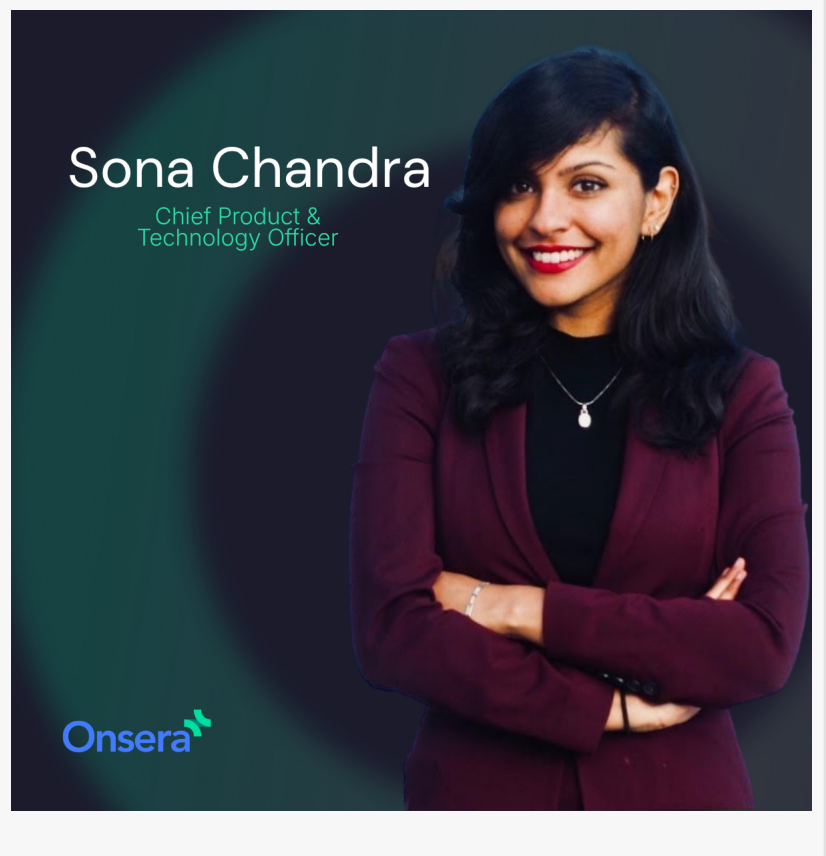

Healthcare AI leader and entrepreneur joins executive team to accelerate the company's AI-native weight management and cardiometabolic care platform.

NEW YORK, NY, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- [Onsera Health](#) today announced the appointment of [Sona Chandra](#) as Chief Product & Technology Officer, bringing one of healthcare's leading AI product innovators to the company's executive leadership team.

Chandra joins Onsera from Pangea Bio, where she served as President, AI and led the design, development and scale of an end-to-end AI drug discovery platform. During her tenure, she drove AI drug discovery programs, and negotiated a co-discovery partnership with a total value of more than \$200 million with a top-10 dermatology company, demonstrating her ability to translate advanced artificial intelligence into meaningful commercial outcomes.

Her appointment comes as employers, health plans, and labor organizations increasingly seek technology-enabled solutions that improve health through weight and cardiometabolic health management while delivering measurable clinical and financial outcomes.

Prior to Pangea Bio, Chandra co-led the spin out of Oshi Health from Takeda Pharmaceuticals, helping build the founding product and clinical model for a company that went on to become one of the nation's leading virtual gastrointestinal care companies. Today, Oshi serves more than 40 million in-network patients and has raised more than \$120 million to expand access to specialty care. Earlier in her career, she helped shape enterprise AI and digital strategy at Takeda alongside the company's Chief Digital Officer.

Throughout her career, Chandra has focused on building products at the intersection of artificial intelligence, healthcare, and life sciences, transforming complex science into solutions adopted by clinicians, researchers, payers, and patients.

"As AI rapidly reshapes healthcare, success will come from moving beyond simply adding AI to existing workflows, and rethinking how care is designed and delivered from the ground up," said Jeff Bernhard, Chief Executive Officer of Onsera Health. Sona has repeatedly demonstrated that she can build AI-powered products and solutions that solve real healthcare problems and scale in highly regulated environments. Her experience and vision make her an exceptional addition to our leadership team as we continue building the future of cardiometabolic care."

At Onsera, Chandra will lead the company's product, engineering, data, and artificial intelligence strategy, advancing the AI-native platform that powers personalized participant experiences, supports clinical decision-making, and enables employers to achieve better long-term health outcomes.

"I'm excited to join Onsera at a time when healthcare has an opportunity to fundamentally rethink how technology and artificial intelligence supports both patients and clinicians," said Sona Chandra, Chief Product & Technology Officer at Onsera Health. "The combination of physician-led care, AI-native infrastructure, and a relentless focus on measurable outcomes creates an opportunity to build something truly differentiated. I look forward to helping scale that vision and continuing to transform how cardiometabolic care is delivered."

Chandra holds a Master of Public Health from the Harvard T.H. Chan School of Public Health and a Bachelor of Science in Biomedical Engineering from the Georgia Institute of Technology. She serves on the Board of Directors for the Center for Addiction Science, Policy and Research (CASPR) and was recognized in Forbes 30 Under 30 for Healthcare & Science.

About Onsera Health

Onsera Health is an AI-native, physician-led weight management and cardiometabolic care company helping employers, health plans, and labor organizations improve health outcomes while reducing the total cost of care. The company's integrated platform combines clinical care, personalized coaching, advanced analytics, and medication management into a single connected experience designed to deliver measurable, sustainable results.
