

# Proficient Plumbing & Heating Helps Jersey Shore Homeowners Cut Energy Costs With High-Efficiency Boiler Upgrades

*Brick-based, family-owned company offers free consultations as Monmouth and Ocean County homeowners look to cut winter heating bills before the cold sets in*

BRICK, NJ, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- Proficient Plumbing & Heating is offering free boiler upgrade consultations to homeowners across [Monmouth and Ocean Counties](#), as rising energy prices push residents to look for ways to lower winter heating bills before the season arrives. The Brick-based, family-run company is promoting high-efficiency boiler replacements as a practical option for homes with aging heating systems.

Save with High-Efficiency Boiler Upgrades

Many homes throughout Toms River, Point Pleasant, Howell, and surrounding Monmouth and Ocean County communities still rely on older boilers that were not built with today's energy costs in mind. As these systems age, they typically run longer and less efficiently to produce the same amount of heat, driving up bills year after year. Standard-efficiency boilers generally operate at 60 to 80 percent efficiency. Modern high-efficiency condensing models can reach 90 percent or higher, meaning less fuel is burned to produce the same amount of heat. Proficient Plumbing & Heating reports that a properly sized, high-efficiency boiler can lower fuel consumption while improving reliability and indoor comfort. For homeowners with older oil-fired systems, the company also converts boilers from oil to gas as part of an upgrade, which can add further long-term savings.

"Homeowners often notice their heating bills climbing even though nothing in the house has changed," said Paul Wylam, founder and CEO of Proficient Plumbing & Heating. "In most cases, the boiler itself has simply gotten older and less efficient. When we walk through the numbers

with a family and show them what a high-efficiency system could save, it becomes an easy decision. We've worked in Monmouth and Ocean Counties since 2010, and helping a neighbor stay comfortable without dreading the bill is part of what makes this work worthwhile."

Proficient Plumbing & Heating's licensed, fully insured technicians evaluate each home's heating needs before making a recommendation.

Technicians review system age, home square footage, insulation, and existing ductwork or piping to help ensure a properly sized system, rather than one that is oversized or undersized for the space. Every recommendation includes a free, upfront estimate, and installations are backed by a one-year warranty on parts and labor along with the company's work guarantee.
