

# VistraTec™ Launches VistraPM™, a Visual Project Management Platform for Transportation Infrastructure and Construction

*VistraPM™ brings visual tracking, project controls, documentation, and AI-assisted insights together to improve infrastructure project delivery.*

JUPITER, FL, UNITED STATES,  
September 1, 2026 /EINPresswire.com/

-- [VistraTec™](#) has launched the new

[VistraPM™](#) Coming Soon website, introducing a visual project management and project controls platform designed for transportation infrastructure, heavy civil construction, and complex capital projects.

## VISTRATEC™

VistraTec™ is the developer of VistraPM™, a visual project management platform for infrastructure and construction.

“

The challenge isn't more project data—it's seeing what that data is telling you. VistraPM™ transforms data into visual intelligence so teams can make better decisions.”

*Scott Case, P.E., Founder,  
VistraTec*

Built for DOTs, transportation agencies, civil engineering firms, contractors, program management organizations, and infrastructure owners, VistraPM™ brings project information, workflows, controls, documentation, reporting, and AI-assisted insights together in one connected operational environment.

### The Challenge

Modern infrastructure projects generate massive amounts of data—but critical information is often scattered across spreadsheets, document repositories, email chains, disconnected logs, schedules, and specialized systems.

The result can be limited visibility, duplicate effort, inconsistent information, delayed decisions, and increased project risk.

The VistraPM™ Solution

VistraPM™ is a Project-Level Management Ecosystem powered by VistraTec's proprietary [Visual Tracking Technology™](#).

Rather than replacing existing agency and enterprise systems, VistraPM™ is designed to serve as an operational layer for project delivery, connecting the people managing projects every day with the information and workflows they need.

One Platform. Connected Project Intelligence.

#### PROJECT CONTROLS

Monitor cost, schedule, quantities, commitments, performance, and risk.

#### DOCUMENTATION & WORKFLOW

Centralize RFIs, submittals, inspections, approvals, and project records.

#### SCHEDULE INTELLIGENCE

Transform complex CPM schedules into visual insights around progress, milestones, critical activities, and emerging delays.

#### AI-ASSISTED INSIGHT

Identify trends, risks, and opportunities to help teams act sooner and make better-informed decisions.

#### Built From Real-World Experience

Founded in 2026 by Scott Case, P.E., VistraTec™ brings more than 30 years of experience delivering complex transportation infrastructure projects for government agencies across the United States.

"The challenge isn't having more project data—it's being able to see what that data is telling you. VistraPM™ was created to transform that data into visual intelligence so project teams can make better decisions." — Scott Case, P.E., Founder, VistraTec™

#### A Shared Vision for Better Project Delivery

VistraPM™ brings together three specialized disciplines:

VISTRATEC™- Infrastructure & Construction Management

EYEDEAL TECH - Software Engineering & Schedule Intelligence

CR DESIGN STUDIOS, LLC - UX/UI & Visual Experience

Together, the partners are developing a more connected, visual, and intelligent approach to

infrastructure project delivery.

## VistraPM™ Is Launching Soon

See the project differently. Manage it more intelligently. Visit [vistrattec.com](https://vistrattec.com) to explore VistraPM™ and join the mailing list to be among the first to receive launch updates and information about upcoming product demonstrations.

Media & General Inquiries: [info@vistrattec.com](mailto:info@vistrattec.com)

### About VistraTec™

VistraTec develops technology solutions designed to modernize infrastructure project delivery. Its flagship platform, VistraPM™, combines visual technology, intelligent automation, and advanced project controls to connect project operations and transform project data into actionable intelligence.
