

Vroozi Named a Leader in Nucleus Research's Source-to-Pay Technology Value Matrix

Recognition highlights Vroozi's usability and functionality in this year's assessment of the source-to-pay market

LOS ANGELES, CA, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- Vroozi, a leading provider of [AI-powered procurement and accounts payable automation solutions](#),

announced today that it has been named a Leader in Nucleus Research's Source-to-Pay Technology Value Matrix, September 2026.

Vroozi Named a Leader in Nucleus Research's Source-to-Pay Technology Value Matrix

"We have focused on the customer experience since day one," said Shaz Khan, Co-founder and CEO of Vroozi. "It's one thing to add features into software, it's another to build a platform that finance, procurement, and business users leverage every day for insights and task execution. Seeing that recognized in independent research tells us we're innovating ahead of user expectations."

“

It's one thing to add features into software. It's another to build a platform that finance, procurement, and business users leverage every day for insights and task execution."

Shaz Khan, Co-founder and CEO, Vroozi

The [Vroozi SpendTech® platform](#) connects supplier marketplace buying, purchasing, approvals, invoice automation, payments, and spend analytics in a unified yet modular procure-to-pay architecture. Its mobile-first, consumer-grade experience makes compliant purchasing and one-click approvals intuitive across the organization,

while configurable workflows and a self-service, no-code administration panel let finance and procurement teams adapt processes without relying on IT.

That usability is paired with automation across the procure-to-pay lifecycle. SmartPR uses AI to convert quotes, statements of work, contracts, work orders, PDFs, and spreadsheets into structured, categorized, ERP-ready purchase requisitions while preserving line-level detail for spend visibility and downstream invoice matching. Vroozi Intelligence automates invoice capture, smart coding, two- and three-way matching, duplicate and fraud checks, and intelligent exception routing. AP Workspace gives accounts payable teams configurable tagging and rules to

organize and manage workloads.

Vroozii is also designed to work within existing technology environments. Open APIs, pre-built ERP connectors, and multiple supplier transaction channels provide flexibility, including pre-built integrations with SAP, Oracle, Deltek Costpoint, and other financial systems.
