

Trocars Market Research Reveals Path To \$1.59 Billion By 2030

*The Business Research Company's
Trocars Market Report 2026 – Market
Size, Trends, And Global Forecast 2026-
2035*

LONDON, GREATER LONDON, UNITED
KINGDOM, September 1, 2026

/EINPresswire.com/ -- "The [trocars
market](#) is experiencing significant

growth, driven by advancements in surgical procedures and rising healthcare needs. As minimally invasive techniques become more prevalent, the demand for trocars continues to expand globally. Let's explore the current market size, growth factors, leading regions, and emerging trends shaping the future of this essential surgical instrument sector.

Steady Expansion and Market Size of the [Trocars Industry](#)

The trocars market has witnessed rapid growth recently, with its value increasing from \$0.95 billion in 2025 to an anticipated \$1.06 billion in 2026, reflecting a robust compound annual growth rate (CAGR) of 11.5%. This expansion during the historic period is largely attributed to the rising number of minimally invasive surgeries, greater adoption of laparoscopic methods, development of hospital surgical infrastructure, heightened infection control measures, and the availability of sophisticated surgical tools.

Projected Growth and Market Outlook for Trocars by 2030

Looking ahead, the trocars market is expected to continue its upward trajectory, reaching \$1.6 billion by 2030 at a CAGR of 10.9%. This forecasted surge is driven by increasing preference for outpatient surgical procedures, growing demand for single-use surgical devices, expansion in bariatric and gynecological surgeries, enhanced focus on surgeon ergonomics, and wider acceptance of advanced access technologies. Key trends shaping the market include the rise of bladeless trocars, greater use of disposable surgical access devices, expansion in optical trocars for minimally invasive surgery, ergonomic system improvements, and a stronger emphasis on

surgical safety.

Understanding the Role of Trocars in Surgery

Trocars are sharp-pointed surgical instruments designed to puncture bodily cavities, allowing access to the intra-abdominal area when used alongside a cannula. These devices facilitate the insertion of surgical tools into blood vessels and enable the release of gas or fluids from internal organs during surgical procedures, particularly laparoscopic surgeries.

How Demographic Changes Are Boosting Demand for Trocars

The global increase in the aging population is expected to drive higher demand for trocars, as age-related health conditions become more common. Older adults often require surgeries that are increasingly performed with minimally invasive laparoscopic techniques. In these procedures, trocars are inserted into the abdomen to minimize patient trauma. For example, a January 2024 report by the Population Reference Bureau highlights that the population of Americans aged 65 and older will rise from 58 million in 2022 to 82 million by 2050, a 47% increase. This demographic trend is a key factor supporting market growth.

North America's Leading Position in the Trocars Market

In 2025, North America held the largest share of the [global trocars market](#), followed by Europe as the second-largest region. The comprehensive market analysis also includes other key regions such as Asia-Pacific, South East Asia, Western Europe, Eastern Europe, South America, the Middle East, and Africa, providing a broad view of global market dynamics.

Our 2026 market reports now include enhanced strategic insights through:

- Market attractiveness scoring and analysis
- Total addressable market (TAM) analysis
- Company scoring matrix graphics and tables
- Excel-based forecasting dashboards
- Market hotspots infographics
- Key technologies and future trend analysis
- Updated graphics and tables
