

GoML Named an OpenAI Select Partner

As an OpenAI Select Partner, GoML will continue working with OpenAI to help organizations build, deploy, and scale AI solutions in production.

NEW YORK, NY, UNITED STATES, September 2, 2026 /EINPresswire.com/ -- GoML, an [enterprise AI systems development company](#), today announced that it has been named an OpenAI Select Partner within the OpenAI Partner Network.

“

Our AI Matic platform enables our Applied AI FDEs to standardize AI builds that work at scale. We typically build and deploy AI systems in production for our customers in 63 days.”

Rishabh Sood, Founder and CEO of GoML

The OpenAI Partner Network is a global program for partners to build, sell, and deliver AI solutions with OpenAI. It brings together partners with deep industry expertise, delivery capabilities, and customer relationships while equipping them with resources, enablement, and support to help enterprises adopt OpenAI frontier models and products and turn them into measurable impact.

As an OpenAI Select Partner, GoML will continue working with OpenAI to help organizations build, deploy, and scale AI solutions responsibly and effectively. This work will help organizations get more useful work from every token and stronger performance per dollar with GPT-5.6, while using ChatGPT Work to turn ambitious goals into finished work.

GoML has developed 130+ AI systems for global startups, SMBs, and enterprises across multiple industries, helping them accelerate AI-powered transformation and meaningfully put AI to work.

“As a pure [AI services delivery company](#), GoML has developed unique capabilities to accelerate customer delivery. Our [AI Matic platform](#) enables our Applied AI FDEs to standardize AI builds that work at scale. We typically build and deploy AI systems in production for our customers in 63 days,” said Rishabh Sood, Founder and CEO, GoML.

GoML supports organizations across North America, Middle East, Germany, India, and Japan with AI systems development and Applied AI engineering. Its work spans use cases like agentic AI, data analytics, distillation, fine tuning, and sovereign software development for industries such as healthcare, finance, ISVs, manufacturing, and telecom.

Looking ahead, GoML plans to expand its OpenAI-related offerings to deploy agentic AI systems

at scale with proven token engineering techniques, helping customers translate AI ambition into business outcomes.
