

InventionHome® Product Developer Creates Deep Cleaning and Sanitizing System for Shoe Soles.

PITTSBURGH, PA, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- "I wanted to create a multipurpose cleaning and sanitizing system for shoes," said an inventor from Morgantown, WV., "so I created a product that would allow a user to easily step onto the system and have the bottom of their shoes scrubbed and thoroughly cleaned with sanitizer and water."

The patent-pending invention provides an improved design for people who may walk inside their homes with their shoes on and end up spreading dirt, germs, bacteria, and other debris on their floors. There are limited ways to clean shoes without leaving them excessively wet and damp. Spending time washing shoes only to be forced to wait days until they are fully dry can be frustrating. The invention features an efficient design that is easy to use so it is ideal for entry into a home, office, or other building.
