

Flowerbulb.eu Highlights Bouquet-Style Planting for Fuller Spring Bulb Displays

PHILADELPHIA, PA, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- Gardeners looking for a simple way to create fuller-looking spring bulb displays can group bulbs together rather than planting them in traditional rows. Known as “bouquet-style” planting, the technique places several bulbs in one planting area to create concentrated clusters of flowers.

The method typically involves planting five to seven bulbs—such as tulips, daffodils or hyacinths—in a single, wide, deep hole. As the bulbs emerge and bloom, the flowers appear together in a dense cluster, creating an effect similar to a bouquet growing in the garden.

Bouquet-style planting can also be used to create drifts or clumps of bulbs throughout a landscape. Grouping bulbs in clusters provides a more natural-looking arrangement while allowing gardeners to create areas of concentrated color.

The technique can be particularly useful in smaller gardens, containers and planting beds where gardeners want to make a strong visual impact with a limited amount of space. Instead of distributing individual bulbs across a large area, grouping them creates defined pockets of color.

“

Bouquet-style planting is an easy way to think about bulbs differently”

*Peggy Anne Montgomery,
horticulturist*

For beginning gardeners, planting in groups can also simplify the design process. Rather than determining the precise spacing for individual bulbs across an entire bed,

gardeners can focus on creating clusters and repeating them throughout the landscape.

“Bouquet-style planting is an easy way to think about bulbs differently,” said Peggy Anne

Montgomery, horticulturist representing [Flowerbulb.eu](https://flowerbulb.eu). "Rather than treating each bulb as an individual plant, grouping bulbs creates a concentrated display that can bring more impact to a garden."

As fall planting season approaches, bouquet-style planting offers another option for gardeners planning spring displays. Tulips, daffodils and hyacinths can be grouped by color, variety or bloom time to create clusters throughout a garden.

For additional information about bulb planting and inspiration for spring gardens, visit [Flowerbulb.eu](https://flowerbulb.eu).

[Royal Anthos](https://www.anthos.org) is a Dutch trade organization that represents the trade companies in flower bulbs and nursery stock products worldwide. For more information, visit www.anthos.org.

Flowerbulb.eu is a promotional agency for the flower bulb sector. Their goal is to educate and inspire new and experienced gardeners. They do not sell flower bulbs; they encourage consumers to visit their local retailer. High-resolution images are available royalty-free when citing
