High Performance Systems Unveils Advanced Industrial Epoxy Flooring Solutions Engineered for 24/7 Logistics Operations

MIDDLESEX, NJ, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- High Performance Systems, a certified industrial flooring contractor serving the Tri-State area since 1988, today announced the expansion of its specialized [epoxy flooring systems for warehouse operations](#) across New Jersey, New York, and Pennsylvania. Engineered specifically to withstand constant forklift traffic and round-the-clock logistics demand, these high-durability floor coatings directly eliminate operational hazards, reduce equipment downtime, and support workplace safety standards.

Epoxy Flooring Tri-State Contractor

Rough, uneven concrete and potholes present significant financial and [safety hazards for active distribution centers](#)—contributing to an estimated 34,900 serious forklift-related injuries annually nationwide, alongside costly vehicle suspension and steering repairs. High Performance Systems combats these challenges by executing a thorough surface preparation process utilizing heavy-duty planetary diamond grinders equipped with HEPA vacuum dust-containment systems, followed by precision patching to eliminate slab-to-slab elevation changes.

The heavy-duty installation combines a squeegee-applied high-solids epoxy layer tailored for optimal thickness, capped with a scratch-resistant aliphatic urethane topcoat. This UV-stable finish prevents concrete dusting, improves light reflectivity throughout facilities, and offers optional anti-slip texturing to protect warehouse personnel.

"Warehouse environments cannot afford continuous repairs or inventory loss caused by unmaintained concrete substrate," said Jeffrey Smedley, President of High Performance Systems. "Our USDA-compliant industrial epoxy floor systems deliver a seamless, high-reflectivity surface that protects sensitive forklift machinery, enhances facility lighting, and eliminates costly operational delays."

Facilities interested in upgrading their distribution center floors can request a project estimate by contacting High Performance Systems at 800-928-7220 or visiting their facility at 436 Lincoln Blvd, Middlesex, NJ 08846.
