

MOBI Highlights Pacifier Thermometer During Baby Safety Month

MOBI highlights its Pacifier Thermometer, designed to help make temperature checks simpler and more comfortable during everyday baby care.

LOS ANGELES, CA, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- [MOBI Technologies](#) is highlighting its Pacifier Thermometer during [Baby Safety Month](#) this September, bringing attention to a baby-care product designed to help simplify temperature checks at home.

Checking a baby's temperature is a common part of everyday care, especially when a child is not feeling well. However, taking a temperature can sometimes be difficult when a baby is tired, uncomfortable, moving, or resistant to a traditional thermometer.

The [MOBI Pacifier Thermometer](#) approaches this everyday challenge with a familiar pacifier-style design. The product combines a digital thermometer with the shape of a pacifier, providing parents and caregivers with a simple option for monitoring a baby's temperature.

The thermometer provides a Quick-Read temperature. It also features a fever alert, a soft silicone nipple designed for comfort, and a digital display that allows parents and caregivers to easily view the temperature reading.

“

Parents need baby-care products that are simple, practical, and easy to have ready when they need them.”

Kiumars Haziq, Director Strategy at MOBI Technologies

“Parents need baby-care products that are simple, practical, and easy to have ready when they need them,” said Kiumars Haziq, Director Strategy at MOBI Technologies. “The Pacifier Thermometer was designed around a familiar shape to help make temperature checks easier to manage during everyday care.”

A Simple Approach to Baby Temperature Checks

Temperature can provide useful information when parents and caregivers notice changes in a baby's behavior or comfort. Having a thermometer available at home can help families monitor these changes and have temperature information available when speaking with a healthcare professional.

MOBI designed the Pacifier Thermometer to make this routine check straightforward. The pacifier-style shape provides a familiar format for babies while the built-in digital thermometer measures and displays the temperature.

Its compact size also allows it to be stored with other baby-care essentials at home or carried in a diaper bag or travel bag.

Key features include a Quick-Read temperature, fever alert, soft silicone nipple, easy-to-read digital temperature display, and familiar pacifier-style design.

The simple operation also helps make the Pacifier Thermometer an accessible addition to a family's baby health essentials. Parents can keep it nearby in the nursery or with other care products, so it is available when needed.

Supporting Baby Care During Baby Safety Month

Baby Safety Month provides an opportunity for families and caregivers to review the products and supplies they keep available for everyday baby care. This can include checking baby health essentials and making sure commonly used products are easy to find and ready when needed.

MOBI is using the September campaign to provide information about baby health and nursery products designed for common needs at home. The Pacifier Thermometer is part of MOBI's broader baby-care portfolio, which includes products for temperature monitoring, nasal care, ear examination, and nursery monitoring.

These products are designed to address different parts of a family's everyday baby-care routine. The portfolio reflects MOBI's continued focus on developing accessible health, wellness, and baby-care products for families.

Throughout Baby Safety Month, MOBI plans to continue sharing product information and educational content focused on everyday baby care and practical solutions for parents and caregivers.

The MOBI Pacifier Thermometer is available as part of the company's growing baby health product collection.
