

InventionHome® Product Developer Creates Wine Erasers to Quickly Remove Red Wine Stains from Lips and Teeth

PITTSBURGH, PA, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- Sandy W. of Pasadena, CA is the creator of the Wine Erasers, a portable wipe that provides a convenient way to freshen up after enjoying red wine without requiring a toothbrush or sink. The product was developed as a simple, portable solution that allows users to quickly reduce visible red wine stains wherever they are.

For many wine enthusiasts, enjoying a glass of red wine often comes with an unwanted side effect: noticeable stains on the lips, teeth, and surrounding mouth area. Whether attending a dinner party, restaurant, winery, or social event, these stains can leave individuals feeling self-conscious and searching for a restroom to brush their teeth. Existing solutions are often inconvenient or unavailable when away from home.

The product provides an easy way to freshen the lips and teeth after consuming red wine to help users maintain a cleaner appearance while continuing to enjoy their evening. The wipe features a dual-sided design that utilizes gentle, naturally inspired cleaning ingredients. One side is infused with diluted white vinegar and baking soda to help clean the lips and remove visible wine residue, while the opposite side is infused with baking soda and spearmint to freshen and clean the teeth. The wipe is stored in a compact, lip-shaped container that can easily fit into a pocket, purse, wallet, or small bag, making it readily available whenever needed.

Key features and benefits include:

- Quickly removes visible red wine stains from the lips, teeth, and mouth area.
- Dual-sided wipe design provides dedicated surfaces for cleaning the lips and freshening the teeth.
- Utilizes gentle ingredients such as diluted white vinegar, baking soda, and spearmint to help reduce staining while leaving the mouth feeling refreshed.
- Compact, portable packaging fits conveniently in a purse, pocket, or wallet for use on the go.
- Eliminates the need to brush immediately after drinking red wine, making it ideal for restaurants, wineries, parties, and other social gatherings.
- Available in a variety of refreshing flavors and scents, including spearmint, peppermint, and additional options.

To use the product, a user simply places the wipe over the end of a finger and gently wipes the lips and teeth to help reduce visible wine stains. The compact design allows one or more wipes to be carried discreetly. Wine Erasers offers wine drinkers an easy way to minimize the visible effects of red wine consumption by combining portability, convenience, and a straightforward application method.

Sandy filed her Utility Patent with the United States Patent and Trademark Office (USPTO) and is working closely with [InventionHome](#), a leading invention licensing firm, to sell or license the patent rights to her Wine Erasers product. Ideal licensing candidates would be U.S. based product manufacturers or distributors looking to further develop and distribute this product innovation.

Companies interested in the Wine Erasers can contact InventionHome at member@inventionhome.com. Inventors currently looking for assistance in patenting, marketing, or licensing their invention can request information from InventionHome at info@inventionhome.com or by calling 1-866-844-6512.

About InventionHome®

InventionHome® is a top-rated invention marketing and product licensing company dedicated to helping inventors successfully patent, prototype, and promote their new product ideas. From securing intellectual property to connecting with potential licensees, InventionHome® offers a streamlined path to commercialization.
