

DASCOM Americas Launches DC-4100 High-Performance Direct-to-Card Printer

New direct-to-card ID card printing solution combines speed, security, versatility and ease of use in a compact design

VERONA, VA, UNITED STATES, September 2, 2026 /EINPresswire.com/ -- DASCOM, a recognized global leader in business printing and technology solutions for more than 35 years, announces the new DC-4100 Direct-to-Card Printer, the latest addition to DASCOM Americas' growing portfolio of ID card and credential printing solutions.

Designed for businesses, schools, healthcare organizations, EMS, government agencies and other organizations that require professional-quality ID card, badge, student and credential printing without unnecessary complexity, the DC-4100 combines fast print speeds, flexible connectivity, enhanced security options and intuitive operation in a compact footprint.

The DC-4100 produces up to 200 full-color, single-sided cards per hour while delivering crisp, edge-to-edge printing for professional identification cards, employee badges, access credentials, membership cards and other card applications. For dual-sided printing, the DC-4100 produces up to 140 cards per hour providing users with the flexibility to select the configuration that best meets their requirements.

100-card input and output feeders make batch printing simple and efficient, while the printer's large 4.3-inch front LCD display provides an intuitive user interface designed to simplify daily operation and consumable management.

Connectivity is equally flexible, with USB and Ethernet standard and optional Wi-Fi connectivity. The DC-4100 is also encoder-ready, allowing organizations to incorporate additional credential technologies as their security and identification requirements evolve.

The DC-4100 is backed by a three-year factory warranty with Hot Swap support, further reinforcing DASCOM's commitment to product quality, reliability and long-term customer value.

"The DC-4100 fills an important position within our expanding card printer portfolio," said Michael Wojciak, Director of Card Printer Sales for DASCOM Americas. "Customers increasingly want more than simply a printer that produces a good-looking ID card. They want speed, security, flexibility and technology that is easy for their employees to use. The DC-4100 brings

those capabilities together in a compact, extremely versatile platform."

The DC-4100 joins DASCOM Americas' expanding family of direct-to-card and retransfer card printers, providing resellers and end users with a broad range of choices for ID card printing, employee badge printing, identification, security, access control and credentialing applications.

DASCOM Americas is located in Central Virginia and serves the North and Latin America markets. DASCOM Americas is a wholly owned subsidiary of DASCOM Holdings, a global technology solutions provider with more than 35 years of experience serving customers in more than 100 countries worldwide.
