

# RLG achieves EcoVadis Gold rating, ranking in the top 4% globally

NEW YORK, NY, UNITED STATES, September 2, 2026 /EINPresswire.com/ -- [Reverse Logistics Group](#) (RLG) has achieved an [EcoVadis](#) Gold rating for its sustainability performance, placing the company in the top 4% of companies assessed globally. As more companies seek to demonstrate their sustainability performance through EcoVadis, achieving a top-tier rating is becoming increasingly competitive. We are therefore particularly pleased to be recognised among the top-performing companies globally, reflecting our continued commitment to sustainability and responsible business practices.

RLG's latest EcoVadis scorecard reflects continued progress in its sustainability performance, with its overall score increasing year on year and placing the company in the 96th percentile globally.

EcoVadis is a globally recognized sustainability assessment platform, evaluating companies across key areas: Environment, Labor & Human Rights, Ethics, and Sustainable Procurement. The assessment provides an important benchmark for organizations looking to measure and continually improve their sustainability performance.

A particular highlight of RLG's latest assessment is its performance in the Environment category. RLG achieved an impressive score of 98/100, including a perfect 100/100 across every environmental indicator assessed. RLG also achieved full marks for its 360° Watch indicator, which considers how the company is represented and recognised through external sources, including media coverage. This is a particularly positive result, reflecting the strong external recognition of RLG's sustainability performance and the positive way in which the company is perceived beyond its own reporting.

This strong environmental performance reflects RLG's continued focus on sustainability and its commitment to supporting the transition towards a more circular economy. Through its environmental compliance, circular take-back, and deposit return systems, RLG works with businesses worldwide to help them meet their environmental responsibilities and improve resource efficiency.

Sustainability is also embedded within RLG's own approach to responsible business. The EcoVadis assessment provides an opportunity to evaluate this work against internationally recognized sustainability criteria, while identifying areas where the company can continue to

develop and improve.

The latest scorecard demonstrates the progress RLG is making across its sustainability strategy, with the company's overall score increasing year on year. Its position in the 96th percentile also highlights the strength of its performance compared with companies assessed by EcoVadis globally.

EcoVadis remains an important benchmark for RLG, providing valuable insight into its sustainability performance and helping to identify opportunities for continued improvement. RLG is committed to building on this latest result and continuing to strengthen its approach across the business.
