

hh2 Launches Vyki, the World's First AI Assistant for Construction Payroll

Construction payroll teams lose a full day, and more to timesheet prep every cycle. Vyki cuts it to minutes.

KAYSVILLE, UT, UNITED STATES, September 2, 2026 /EINPresswire.com/ -- hh2 Cloud Services

“

I've asked Vyki to do things I didn't expect her to handle, and she handles them. I can't imagine life without her.”

*Rosemary Nocera-Williams,
Aero Mechanical*

today announced Vyki, the first AI assistant built for construction back-office work, starting with time tracking and payroll. Vyki catches payroll problems before they hit the pay run, fixes them with your approval, and logs every change.

The payroll problem

Construction payroll isn't general business payroll. Union rules, prevailing wage, multi-state taxes, and certified payroll audits all have to be right, and most teams still get

there by hand. Payroll admins spend the days before each run chasing missing hours, fixing cost codes, and hunting down supervisors for approvals. What should take hours takes days.

What Vyki does

Vyki works two ways. She reviews time as it comes in and flags what's wrong: missing hours, bad cost coding, compliance risk. Or you tell her to handle a task and she completes it. You set how much she does on her own.

Most software stops at the alert. Vyki makes the fix, records it, and hands you the result to check. Every action is reversible, the same as manual entry. You keep control and your audit trail stays clean.

She knows cost codes, job phases, crew structures, union and non-union payroll, prevailing wage, and multi-state tax, because hh2 has spent 20+ years building for construction and nothing else. She lives inside the hh2 time tracking solution thousands of construction teams already use. No new system, no new login.

"I've asked Vyki to do things I didn't expect her to handle, and she handles them. I can't imagine life without her."

— Rosemary Nocera-Williams, Public Relations and Human Resources, Aero Mechanical

"Construction payroll is one of the most complex operational challenges our customers face, and it's consuming time that could be spent on strategy and profitability," said Jamie Clymer, CEO at hh2. "We built Vyki to handle what slows teams down so they can focus on what moves their business forward. She's built for the realities of construction because that's all hh2 has ever done."

What's next

Vyki starts in time tracking and payroll. More of hh2's back office will follow including Vyki for accounts payable. Same assistant, same login.

Available today

Vyki is available now for hh2 customers using time tracking and payroll. Learn more at www.hh2.com/meet-vyki.

About hh2

hh2 is the AI construction platform built by contractors, for contractors. The company is trusted by over 3,500 contractors nationwide and helps firms manage payroll, time tracking, accounts payable, and project costs without disrupting how they work. With AI-native technology, mobile-first tools, flexible approvals, and deep integrations with major construction management systems like Sage, Foundation, Quickbooks, Spectrum, and CMiC, hh2 connects field data to the office and simplifies how construction teams manage people, payments, and projects. Learn more at www.hh2.com.
