

# United One (Group) America Introduces UOG's Growing Made-in-USA Wearable Wellness Portfolio

*From CES 2026 award-winning products to sports performance solutions, UOG brings advanced textile technology to wellness, recovery and active lifestyles*

ATLANTA, GA, UNITED STATES, September 2, 2026 /EINPresswire.com/ -- United One (Group) America, Inc. today introduced the expanding portfolio behind UOG, its technology-driven wearable wellness and sports performance brand designed around a simple principle: wellness and performance support should be practical enough to become part of everyday life.

Headquartered in Georgia, United One (Group) America develops and manufactures a growing range of UOG wearable products in the United States, bringing together advanced textile technology, functional product design and everyday wearability.

The portfolio extends from award-winning wellness products to performance sports socks, golf socks, knee sleeves, arm sleeves, wrist and forearm support products, performance apparel and other wearable solutions.

Rather than developing unrelated individual products, UOG is building a broader wearable wellness platform around technologies that can be incorporated into products serving different activities, environments and consumer needs.

That approach received significant recognition at CES® 2026, where UOG products earned three

The infographic is divided into two main sections. The left section, titled 'CES 2026', features the CES logo and the text 'Advanced Wellness. Elevated Performance.' Below this, it states that United One Group (UOG) Healthcare Products achieved major recognition at CES 2026, winning 3 prestigious awards and being officially featured by a CES spokesperson. It then displays three award trophies: 'TechRadar Best of CES 2026 Winner', 'TWICE PICKS Awards 2026 Winner', and 'TWICE PICKS Awards 2026 Winner'. At the bottom of this section, it mentions 'Powered by Black Diamond Carbon & Nano Silver Technology' and 'Innovative materials that support recovery, comfort, and performance.' The right section, titled '5-in-All Wellness Technology', is subtitled 'Engineered for Total Body Support'. It features a central image of a man in a black athletic suit with various sensors. Callouts point to different parts of the suit: '5-in-All Wellness Band' (Enhances rest & recovery), 'Tank Top' (Supports posture & core stability), 'Arm Sleeves' (Promotes circulation & reduces fatigue), 'Bodysuit Shaper' (Contours & supports for a streamlined fit), 'Shapewear Control Pantie' (Provides shaping & confidence), 'Knee Sleeves' (Stabilizes & supports knee performance), 'Calf Sleeves' (Improves circulation & reduces soreness), 'Pro Sports Socks' (Cushioned comfort & moisture-wicking), and 'Pain Relief Socks' (Helps reduce foot pain & swelling). At the bottom of the infographic, it says 'UOG Healthcare Products' and 'Innovative Wellness Solutions for a Better Life.' Below this are icons for 'Advanced Technology', 'Quality Assurance', 'Health & Wellness', and 'Global Vision'.

editorial awards.

UOG received:

- Two TWICE Picks Awards recognizing the [UOG 5-in-All Wellness Band](#) and UOG 5-in-All Wellness Foot Pain Relief & Diabetic Support Socks
- One TechRadar Pro Picks Award recognizing the UOG 5-in-All Wellness Band

The recognition brought broader attention to UOG's approach of integrating advanced materials into products that can be worn during everyday routines rather than requiring another electronic device, application or complicated system.

One Technology Platform, Multiple  
Everyday Applications

United One (Group) America's product strategy is based on the idea that wearable wellness should not be limited to one activity or one demographic.

“

We are building UOG as a wearable wellness platform that brings advanced textile technology into products people can comfortably wear for sports, work and everyday life.”

*David Kim, V.P., United One  
(Group) America, Inc.*

environments.

The company's portfolio addresses applications including:

## BETTER BALANCE. STRAIGHTER SHOTS.

Foot Stability

Arch Support

Longer Drives

UOG Pro Golf Socks — Made in USA performance technology designed for comfort, stability and extended play.

Consumers today move between very different environments throughout a single day.

An individual may spend hours working at a desk, walk extensively during work, exercise in the evening, travel frequently or participate in sports on weekends. Athletes and coaches face different demands, but they also value products that can provide comfort and practical support without interfering with natural movement.

UOG develops wearable products for these real-world

- Everyday wellness and comfort
- Sports performance and training
- Golf and extended rounds
- Tennis and pickleball
- Running and fitness
- Workplace and extended standing
- Travel and mobility
- Recovery and relaxation
- Active lifestyles and senior wellness

This multi-application approach allows United One (Group) America to apply its core technology across different product categories while adapting each product to its intended activity.

Advanced Black Diamond Carbon Technology & Nano Silver Technology

At the center of the UOG platform are the company's Advanced Black Diamond Carbon Technology & Nano Silver Technology.

Advanced Black Diamond Carbon Technology incorporates specialized carbon-based materials into wearable textile applications. UOG uses the technology in products designed around comfort, circulation support, physical activity and extended wear.

Nano Silver Technology is incorporated into selected products to support freshness and odor management, an important consideration for products used during sports, travel, work and other extended-wear situations.

The combination allows UOG to pursue a fundamentally different approach to wearable technology.

There are:

- No batteries to recharge
- No apps to install
- No electronic sensors to manage
- No complicated setup

The technology is incorporated directly into products people can wear as part of their normal

## HOW TO WEAR & WHERE TO USE

UOG SPORTS SOCKS

1. Wear directly during sports, training, or daily activities. 
2. For professional sports use, wear UOG Sports Socks first, then regular athletic socks for even better results. 

 **All-sport performance + all-day comfort** 

  
Basketball

  
Soccer

  
Baseball

  
Running

  
Volleyball

  
Golf

  
Long Work Shifts

 **Breathable**  
Keeps feet cool

 **Supportive**  
Stays in place

 **Moisture-Wicking**  
Dries fast

 **Cushioned Comfort**  
Reduces impact

UOG Performance Sports Socks bring advanced wearable technology to running, fitness, golf, tennis, pickleball and team sports.

routines.

UOG's development priorities include comfort, breathability, movement, everyday usability and performance-oriented support.

### UOG 5-in-All Wellness Band

TWICE Picks Award & TechRadar Pro Picks Award Winner — CES 2026

The UOG 5-in-All Wellness Band is one of the flagship products demonstrating the company's wearable wellness philosophy.

The soft, flexible band is designed to integrate easily into everyday relaxation, work, travel and nighttime routines.

Its design focuses on five areas of everyday wellness:

- Deep Sleep
- Head Comfort
- Eye Comfort
- Neck & Shoulder Comfort
- Relaxation and Stress Relief

Unlike many modern wellness products, the Wellness Band does not require charging, pairing with a smartphone or monitoring through an application.

The concept is intentionally simple: wearable wellness without electronic complexity.

This combination of simplicity, versatility and practical use helped the Wellness Band earn recognition from both TWICE and TechRadar Pro at CES 2026.

### UOG 5-in-All Wellness Foot Pain Relief & Diabetic Support Socks

TWICE Picks Award Winner — CES 2026

### UOG 5-in-All Wellness Band: Multi-scene Relief

#### Deep Sleep

Enhance sleep quality, relieve insomnia.

#### Headache Relief

Soothe tension headaches and migraines.

#### Eyesight Support

Improve vision, reduce eye strain.

#### Neck & Shoulder Pain Improvement

Alleviate chronic neck and shoulder discomfort.

CES 2026 award-winning UOG 5-in-All Wellness Band offers simple, non-electronic wearable wellness for everyday life.

UOG's second CES award-winning product focuses on one of the most fundamental aspects of everyday mobility: foot comfort.

The UOG 5-in-All Wellness Foot Pain Relief & Diabetic Support Socks are designed for comfortable extended wear and for consumers who place a high priority on foot comfort during everyday activities.

Design elements include:

- Targeted cushioning
- Supportive arch construction
- Breathable materials
- Comfortable extended-wear design
- Freshness and odor-management technology

The product demonstrates how UOG applies its technology platform differently depending on the intended consumer and use environment.

### UOG 5-in-All Wellness Performance Sports Socks

UOG's technology platform also extends directly into athletic performance.

The UOG 5-in-All Wellness Performance Sports Socks were developed as a versatile sports product capable of supporting a wide variety of athletic activities rather than being restricted to a single sport.

Potential applications include:

- Running
- Golf
- Tennis
- Pickleball
- Basketball
- Soccer
- Fitness and gym training
- Walking and hiking

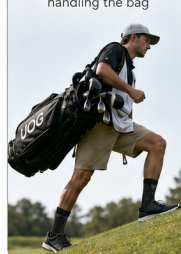

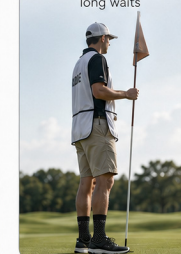

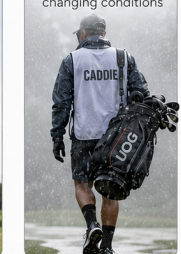

**Made for the Demands of Caddie Life**

|  |  |  |  |

One pair built for every part of the round.

UOG Caddi Socks are Made in USA and designed for extended comfort during long hours of walking and standing on the course.

- Training and other active environments

The Performance Sports Socks combine UOG's textile technology with performance-oriented construction focusing on foot stability, cushioning, breathability and comfort during extended activity.

For athletes and active consumers, this creates a product designed not only around how the foot feels inside the shoe, but around the broader demands of movement and prolonged activity.

The multi-sport design also creates potential opportunities for sports teams, coaches, academies, fitness organizations and athletic programs seeking products that can serve athletes participating in different activities.

### Specialized Golf, Tennis and Pickleball Products

UOG is further expanding its sports portfolio with products developed around specific activities.

UOG Pro Golf Socks are designed around the demands of golfers who may spend several hours walking, standing and repeatedly transferring weight throughout a round.

UOG Caddie Socks focus on extended-wear comfort for individuals who may spend long periods walking and standing on the golf course.

UOG Tennis & Pickleball Sports Socks are designed with the lateral movement, rapid direction changes and repeated foot impact associated with racquet and paddle sports in mind.

Together, these products demonstrate how one underlying technology platform can be adapted to different athletic environments.

### [UOG 5-in-All Wellness Knee Sleeves](#)

UOG's wearable technology extends beyond socks into products designed for other areas of the body.

The UOG 5-in-All Wellness Knee Sleeves combine flexible construction with comfortable support for movement and activity.

They are designed for applications including:

- Athletic training
- Golf
- Tennis and pickleball
- Walking and hiking

- Extended work activity
- Everyday mobility

Rather than functioning as a rigid brace, the product is designed to provide comfortable support while allowing natural movement.

This distinction reflects a broader UOG development philosophy: support the body without unnecessarily restricting it.

### Sports Arm Sleeves, Wrist & Forearm Bands and Calf Sleeves

The UOG sports and wellness platform continues through several additional wearable categories.

UOG Sports Arm Sleeves are designed for active consumers participating in golf, tennis, fitness and other activities involving repeated upper-body movement.

The UOG Wrist & Forearm Muscle Activation Band is designed around activities involving repeated wrist and forearm use, including golf, tennis, pickleball, fitness and occupational activities.

UOG Calf Sleeves extend the platform to the lower leg for sports, walking, travel and active everyday use.

These products allow United One (Group) America to address different areas of the body while maintaining a consistent approach to wearable comfort and functional support.

### Expanding into Performance Apparel

United One (Group) America is also applying UOG technology to larger wearable surfaces through performance apparel.

Products include the UOG Performance Tank Top and Performance Shorts, designed around comfortable movement and performance-oriented wear.

This expansion demonstrates the scalability of UOG's technology beyond individual socks, bands and sleeves.

The long-term opportunity is to incorporate the company's technology across a broader ecosystem of wearable products serving wellness, sports and active lifestyles.

Made in USA

A central part of United One (Group) America's strategy is its commitment to manufacturing UOG performance and wearable wellness products in the United States.

Domestic manufacturing allows the company to combine product development, material selection, manufacturing and continuous product refinement within its U.S. operations.

For consumers and potential business partners, the company's Made-in-USA strategy provides another point of differentiation in markets where many apparel and wellness products have become highly commoditized.

United One (Group) America's objective is not simply to produce another sock, sleeve or wearable accessory.

The company's goal is to combine advanced materials, functional design and American manufacturing to create differentiated products with practical everyday applications.

### One Portfolio, Multiple Markets

The breadth of the UOG platform creates opportunities across multiple consumer and commercial markets.

Potential channels include:

- Sporting goods retailers
- Golf clubs and Pro Shops
- Golf academies and instructors
- Tennis and pickleball facilities
- Fitness organizations
- Specialty wellness retailers
- Healthcare-oriented retail channels
- Corporate wellness programs
- Athletic teams and organizations
- International distributors

United One (Group) America continues to explore relationships with retailers, distributors and organizations interested in introducing UOG products to their customers, members and athletes.

### Building the Future of Wearable Wellness

Technology does not always need another screen.

United One (Group) America believes some of the most useful wellness technologies may

ultimately become technologies consumers barely have to think about because they are incorporated directly into products they already wear.

That philosophy is guiding UOG's development from its CES 2026 award-winning Wellness Band and wellness socks into a broader family of sports performance and everyday wellness products.

“UOG is not built around one product. We are building a technology platform that can become part of what people already wear for work, sports, travel and everyday life. Our goal is to make advanced wearable wellness practical, comfortable and accessible.”

— David Kim, V.P., United One (Group) America, Inc.

### Looking Ahead

Building on its CES 2026 recognition, United One (Group) America plans to continue expanding the UOG portfolio and developing relationships with retailers, distributors, sports organizations, wellness professionals and international partners.

The company's long-term vision is to build UOG at the intersection of:

Wellness + Performance + Advanced Textile Technology + Everyday Wear

From award-winning wellness products to sports socks, Knee Sleeves, Arm Sleeves and performance apparel, the portfolio shares one common objective:

Making wellness something people can wear every day.
