

Glory of Galaxy by Jomai Wins Gold at A' Construction and Real Estate Projects Design Award

Jomai Receives Gold A' Design Award for Glory of Galaxy, a Residential Design Bringing Garden Living to High Rise Homes

COMO, CO, ITALY, September 2, 2026 /EINPresswire.com/ -- The A' [Design Award](#) has announced Glory of Galaxy by [Jomai](#) as a Gold winner in the Construction and [Real Estate](#) Projects Design category. The A' Construction and Real Estate Projects Design Award is one of the highly respected and well recognized recognitions within the real estate and design fields, drawing entries from numerous countries and evaluating each submission against pre established professional criteria. This distinction acknowledges Glory of Galaxy as an exceptional example of residential design, developed by Jomai for client Longfor in Chongqing, China. The recognition places the project among works noted for innovation, thoughtful planning, and meaningful contribution to the built environment.

The Gold A' Design Award for Glory of Galaxy holds relevance for the broader real estate industry, where the demand for higher quality living environments continues to grow amid increasing land constraints. By introducing the concept of garden living into high rise residences, the project addresses a pressing challenge faced by dense urban centers. Its hybrid model integrating high rise flats and low rise villas offers practical guidance for developers seeking to balance privacy, spaciousness, and efficient land use. The project demonstrates how intensive development can coexist with generous public space and natural elements, providing tangible benefits for residents and stakeholders alike.

Glory Of Galaxy

Glory of Galaxy adopts a mixed height layout that merges villa level courtyards with flat level expansive views, creating a lifestyle that combines seclusion with openness. The facade draws inspiration from the spoilers of supercars and the letter T in the word TOP, infusing the building with a sense of modernity through gentle horizontal lines, warm materials, and rounded corners. Aluminum panels and stone in varying colors enrich the facade with distinct textures, producing a floating, hyperfluid presence. The project marks the first implementation of the fourth generation residence model in Chongqing, leveraging innovative spatial planning to deliver high quality living within limited land. A zoning approach places stone in the lower levels and paint in the upper levels, with materials customized in factories for waterproof and moisture resistant performance.

The Gold A' Design Award recognition for Glory of Galaxy serves as encouragement for the Jomai team to continue refining the relationship among people, architecture, and nature. The project conveys a contemporary philosophy of dwelling through restrained luxury, natural order, and the ritual of home returning, offering new directions for future city living solutions. This achievement supports ongoing exploration of sustainable materials, spatial sequencing, and the interplay of light and shadow within residential design. The distinction may inspire further work that balances outward prestige with inward poetry.

Project Members

Glory of Galaxy was brought to life by a dedicated team at Jomai, with contributions from Linfeng Li, Xing Xiao, Xiaoduo Sun, Wei Wang, Yu Du, Kunjie Zhang, Tao Liu, Kaiwu Wang, Zengyang Wang, Xue Ren, and Mengyu Tao, who together advanced the architectural planning, facade development, and material applications that define the project.

Interested parties may learn more about Glory of Galaxy, view additional details, and explore the work of its designers at the dedicated page provided by the A' Design Award. Visitors can find images, descriptions, and background information about the project and its creators.

About Jomai

Jomai was established in 2020 and holds a Class A qualification for architectural engineering design. Based in China, it is a diversified design institution with senior professionals in planning and architecture, a strong technical research and development team, and practical experience aligned with international standards. With meticulous craftsmanship as the core of its company culture, Jomai is committed to continuous innovation and to customizing exclusive services for its clients. The firm takes the inheritance of culture and the fulfillment of social needs as its responsibility, remaining true to its original aspiration within a rapidly changing market.

About Longfor

Longfor Group Holdings Limited is a comprehensive enterprise group established in Chongqing in 1993 and registered in the Cayman Islands, with headquarters now in Beijing. It was listed on the Hong Kong Stock Exchange in 2009 under stock code 960. The core business of the group

covers real estate development, commercial operation, rental housing, and smart services, spanning six major fields and reaching more than 40 cities across the country. Longfor has been listed among the Fortune Global 500 and the top 100 private enterprises in China for many consecutive years, and has been selected among the top 50 best public companies in the Asia Pacific region by Forbes three times. Its Tianjie commercial brand draws annual foot traffic exceeding 400 million people, while its rental housing brand operates over 50,000 units across 16 cities.

About the Gold A' Design Award Recognition

The Gold A' Design Award is granted to designs that demonstrate notable innovation and a meaningful impact on their intended audience. Within the Construction and Real Estate Projects Design category, evaluation considers criteria such as innovative use of space, sustainable design implementation, architectural excellence, integration with the surrounding environment, functional efficiency, and aesthetic appeal. Further considerations include the inclusion of smart technologies, economic viability, adherence to safety standards, incorporation of green spaces, user comfort, cultural sensitivity, durability, and adaptability to changing needs. Designs recognized at this level reflect strong technical attributes, careful artistic skill, and thoughtful consideration of local climate and material efficiency. The recognition serves as a benchmark for excellence, encouraging continued innovation within the field.

About A' Design Award

The A' Construction and Real Estate Projects Design Award is a respected competition for the construction and real estate industry, offering companies, designers, and brands an opportunity to present their creative works and gain international recognition. Entries are evaluated through a blind peer review process, assessed against pre established criteria by an expert jury panel comprising design professionals, real estate industry experts, academics, and journalists. Organized since 2008 and now in its 18th year, the A' Design Award is an international and juried competition held across all industries, with participation open to entries from all countries. The ultimate aim of the A' Design Award is to recognize and promote superior products and projects that advance and benefit society, driven by a philanthropic mission to help create a better world through the transformative power of good design.
