

Bullard and DuPont Bring Joint Commitment to Worker Safety to OGA 2026

New safety collaborators share a joint exhibition booth, spotlighting complementary PPE solutions for oil & gas operations

MALAYSIA, September 2, 2026 /EINPresswire.com/ -- [Bullard](#) and [DuPont](#) today marked their new collaboration in worker safety at the opening of OGA 2026, the offshore and oil & gas industry exhibition taking place September 2–4 in Kuala Lumpur. The two companies are sharing a joint booth with common distributor Poly Scientific Sdn Bhd at Hall 2, Booth #2201, where they are showcasing personal protective equipment (PPE) solutions designed to complement one another across demanding oil & gas applications.

Bullard and DuPont, both manufacturers of PPE, share a common vision of bringing workers home safely through product innovation. Since launching their collaboration earlier this year, the two companies have partnered on joint safety webinars and workshops, and now extend that partnership to the show floor with a shared booth at OGA 2026.

At the joint booth, the companies are highlighting how DuPont's Tyvek® and Tychem® protective garments and Bullard [Supplied Air Respiratory](#) systems work together to protect workers across a range of oil & gas applications, including tank cleaning, inspection, petrochemical manufacturing, and surface preparation for infrastructure projects. Presented together, the two product lines are intended to offer a more complete protection solution for workers facing some of the industry's most demanding environments.

Attendees can visit the joint Bullard and DuPont booth at Hall 2, Booth #2201 throughout OGA 2026, running September 2–4 in Kuala Lumpur.

About Bullard

Founded in 1898, Bullard is the leading designer, developer, manufacturer, and marketer of personal protection equipment for people who work in hazardous conditions. Products include industrial head and face protection, supplied-air respiratory protection for industries, and powered-air respiratory protection for pharmaceutical and healthcare, fire and rescue helmets, and thermal imaging cameras for firefighting. Headquartered in Cynthiana, Kentucky, Bullard is a fifth-generation, family-owned company. All Bullard products are made proudly in the U.S.A. and are built with your safety in mind.
