

BURRAPAY LAUNCHES DIRECT-TO-DEVICE (D2D) CRYPTO PAYMENT TECHNOLOGY

Compliant Cryptocurrency Deposits, Built for the Casino Floor

LAS VEGAS, NV, UNITED STATES, September 2, 2026 /EINPresswire.com/ -- [BurraPay](#), the leading provider of cryptocurrency payment solutions for the regulated casino gaming industry, has announced the launch of its new Direct-to-Device (D2D) payment platform that enables players to fund their gaming activities with cryptocurrency directly at their gaming device.

BurraPay's patented Direct-to-Device technology lets players easily fund their gaming device - slot machine, gaming terminal, or connected gaming table - directly with cryptocurrency almost immediately, eliminating trips to the cage or cashier, and removing lengthy wait times normally associated with cryptocurrency payments. With BurraPay's technology, all required AML compliance checks occur swiftly and seamlessly behind the scenes.

“

Our Direct-to-Device technology allows players to easily deposit their cryptocurrency directly at their gaming machine, eliminating all points of friction normally associated with crypto funding.”

Luke Millanta, CTO and Co-Founder of BurraPay

In announcing the launch of the D2D product, [Luke Millanta](#), CTO and Co-Founder of BurraPay stated, “We are ecstatic to launch our Direct-to-Device technology that will allow players to easily deposit their cryptocurrency directly at their gaming machine, eliminating all points of friction normally associated with crypto funding. Our D2D product streamlines all of these processes into one simple action for the player - at their machine - and, most importantly, gets them playing!”

BurraPay's patented crypto payment platform was

specifically engineered to meet the rigorous compliance standards demanded by U.S. gaming regulators - a barrier that has until now kept cryptocurrency entirely out of the licensed casino ecosystem. The company also offers both a fully-embedded platform that integrates directly with casino player account management systems in land-based, iGaming, and online sportsbook environments; and an over-the-counter solution that has been developed for rapid deployment in land-based casino environments. All BurraPay's solutions utilize the Company's portfolio of patented technologies covering the secure, AML-compliant use of cryptocurrency - including Bitcoin, Ethereum and Litecoin - and stablecoins in casino environments, as well as blockchain monitoring tools capable of detecting problem gambling behaviours in real time.

BurraPay User Interface Device

Millanta added, "We developed this technology to incorporate all the same KYC/AML and anti-fraud checks that regulators require, in a swift and secure process that ensures compliance for the operators while meeting the needs of players on the casino floor. We believe this will be a game changer for casino gaming payments."

BurraPay will roll-out their Direct-to-Device product on a jurisdiction-by-jurisdiction basis, based on regulatory approvals.

###

About BurraPay

Founded in 2015 by crypto industry pioneer, Luke Millanta, and gaming legal and regulatory compliance veteran, David Greenslade, BurraPay is a financial technology company that designs, builds and delivers secure, regulatory-compliant cryptocurrency payment solutions for the global gaming industry, with a particular focus on the rapidly growing US iGaming and sports betting markets. In June 2026, BurraPay became the first cryptocurrency payments processor to operate in Nevada's regulated gaming market, processing the first legal crypto-funded sports wager in Las Vegas history. BurraPay provides licensed operators and regulators with a transparent, auditable way to facilitate digital asset transactions that meet the highest standards of compliance and transparency.
