

Genesis Regenerative Announces Pain Awareness Patient Education Event with North Carolina Physician Dr. Jenna Lambeth

In recognition of Pain Awareness Month, the September 22nd session in Belmont, NC, is free and open to patients, families, and care providers.

BELMONT, NC, UNITED STATES, September 3, 2026 /EINPresswire.com/

-- [Dr. Jenna Lambeth](#), M.D., a double board-certified anesthesiologist and pain management physician whose Belmont practice offers the [Genesis Regenerative Protein Array](#) (RPA), will

host a free patient education event on Tuesday, September 22nd, in recognition of Pain Awareness Month. The session runs from 6:00 to 7:30 p.m. at Home2 Suites by Hilton Charlotte Belmont, 871 Hawley Avenue, Belmont, and is open to the public.

Applied Science For Regeneration... Service Above Self... Excellence In All We Do.

“

I'm really a diagnostician. I'm trying to figure out what went wrong. Why is their body not healing? And how can I help them get back to doing the things that they love?”

Jenna Lambeth, M.D. of the Southeast Pain and Spine Care in Belmont, NC

The evening is built around conversation rather than a lecture. Attendees can meet Dr. Lambeth, hear about her experience treating patients, and ask questions about options for managing chronic pain. Refreshments will be provided, and family members, friends, and care providers are welcome to attend alongside patients.

Dr. Lambeth practices at Southeast Pain and Spine Care in Belmont, about fifteen minutes from Charlotte. She earned her medical degree from the Medical University of South Carolina and completed an anesthesiology residency and a pain management fellowship at Vanderbilt University

Medical Center. Her practice centers on helping patients recover from complex spine and sports injuries without relying on traditional opioid medications.

What she describes as the core of the work is figuring out why a body has not recovered on its

own. "I'm really a diagnostician. I'm trying to figure out what went wrong. Why is their body not healing? And how can I help them get back to doing the things that they love?"¹

Alongside interventional procedures, she offers regenerative options including prolotherapy, platelet-rich plasma, and RPA. Genesis describes RPA as an acellular, non-DNA regenerative protein array containing naturally occurring signaling proteins. Southeast Pain and Spine Care is an independent practice, and Dr. Lambeth is among the clinicians nationally who offer RPA to their patients.

She explains the goal of the work in terms of what a patient wants back rather than what hurts. "My goal for you is not only to improve your pain but to really get back to the things that you love"¹. Her treatment plans are individualized, weighing biomechanics, inflammation, metabolic health, nutrition, rehabilitation, and lifestyle alongside the presenting injury.

Pain Awareness Month is observed each September to raise public understanding of chronic pain and the options available to people living with it. Events of this kind give patients a chance to ask questions outside an appointment, where time is short, and the agenda is usually set by the visit.

Attendance is free, and registration is requested. Patients can register at BSNevents.com/2693c or contact Southeast Pain and Spine Care in Belmont at 704-862-4700.

About Dr. Jenna Lambeth

Dr. Jenna Lambeth, M.D., is double board-certified in anesthesiology and pain management and practices at Southeast Pain and Spine Care in Belmont, North Carolina. She earned her medical degree from the Medical University of South Carolina and completed her anesthesiology

Southeast Pain & Spine Care

Southeast Pain and Spine Care has locations in Belmont and Charlotte NC

Dr. Jenna Lambeth is a double-board-certified physician at Southeast Pain & Spine Care in Belmont NC

residency and pain management fellowship at Vanderbilt University Medical Center.
