TÜV Rheinland and BG Networks announce strategic partnership to accelerate product cybersecurity compliance

BOSTON, MA, UNITED STATES, September 3, 2026 /EINPresswire.com/ -- TÜV Rheinland North America, part of TÜV Rheinland, a global leader in independent testing, inspection, and certification services, and BG Networks, an innovative provider of an automation platform for threat modeling and risk assessment in connected devices, today announced a new strategic partnership. This collaboration will streamline and accelerate cybersecurity compliance, testing, and security implementation for connected device manufacturers worldwide.

> “Manufacturers are navigating a complex web of new cybersecurity regulations. By partnering with BG Networks, we can quickly assess vulnerabilities and compliance gaps, and strengthen product security.”
>
> *Sven Nowak, Regional Business Stream Manager at TÜV Rheinland North America*

"Manufacturers across multiple industries are navigating a complex web of new global cybersecurity regulations," said Sven Nowak, Regional Business Stream Manager at TÜV Rheinland North America. “By partnering with BG Networks, we can accelerate our service offering, allowing us to quickly assess vulnerabilities and compliance gaps, strengthen product security, and make final testing and conformity much faster and more predictable.”

As global regulations like the EU Cyber Resilience Act (EU CRA), EU Medical Device Regulation, and U.S. FDA cybersecurity requirements under the FD&C Act, mandate strictly enforced device security, manufacturers face immense pressure to secure their products and demonstrate conformity quickly. Compliance is both time- and cost-intensive, potentially requiring thousands of hours of work for product portfolios. In addition, many manufacturers lack the regulatory expertise required to achieve compliance. Together, TÜV Rheinland’s world-class testing and certification expertise combined with BG Networks’ security automation platform offers a simplified, comprehensive, and economical end-to-end pathway to cybersecurity compliance.

"BG Networks' mission has always been to automate cybersecurity, making it faster and easier to implement" said Colin Duggan, CEO at BG Networks. "Teaming up with a prestigious global entity like TÜV Rheinland allows customers to reduce the time and cost of adherence to global product cybersecurity regulations.”

For customers who wish to better understand their exposure to the EU CRA, TÜV Rheinland will offer a no-cost product categorization and assessment for up to 10 products. Interested companies should attend the companies' joint webinar on September 10 to learn more or reach out directly to cyberfusa@us.tuv.com.

About TÜV Rheinland
TÜV Rheinland is a leading provider of testing and inspection services worldwide. For over 150 years, the company has helped make the world a safer place. Today, more than 29,000 employees test, inspect and certify products, plants and processes, while also providing training for people in a wide range of professions. Operating from 500 locations in more than 50 countries, TÜV Rheinland helps safeguard key areas of business and everyday life. Headquartered in Cologne and generating annual revenue of close to €3 billion, the company plays a key role in quality assurance worldwide. TÜV Rheinland has been a member of the UN Global Compact since 2006, demonstrating its commitment to anti-corruption and sustainability. Website: www.tuv.com

About BG Networks
BG Networks delivers a cybersecurity software platform and services that enable engineers, product managers, and security teams to easily implement security in embedded and IoT devices. With a focus on automation and removing the complexity of cybersecurity protocols, BG Networks helps companies protect their intellectual property and comply with evolving global cybersecurity standards.
