

UpSolv Signs Major Long-Term Supply Agreement with Nexkemia for High-Purity Recycled Polystyrene

MONTREAL, QUEBEC, CANADA, September 3, 2026 /EINPresswire.com/ -- We are pleased to announce the execution of a long-term supply agreement with NexKemia, marking a significant milestone in the commercialization of UpSolv's proprietary dissolution technology.

Together with our previously executed commercial agreements, this agreement represents a major step forward in the development of UpSolv's first commercial recycling facility in Quebec and provides strong validation of both our technology and our business model.

Under this long-term partnership, UpSolv will supply recycled polystyrene to NexKemia, supporting the production of [high-quality circular EPS resins](#) while establishing a reliable commercial outlet for our first plant.

Beyond its commercial significance, this partnership reflects a shared commitment to diverting polystyrene from the waste stream, including hard-to-recycle material and transforming it into high-value products, thereby supporting the transition toward a circular economy.

"We are pleased to partner with UpSolv, whose innovative dissolution technology represents a significant advancement beyond traditional mechanical recycling. This collaboration will help increase the recycling of polystyrene across North America by enabling the recovery of materials that are often difficult to recycle through conventional methods. Together, we are supporting the development of a more circular economy and creating sustainable solutions that deliver both environmental and commercial value," said Stéphane Trépanier, General Manager of NexKemia.

Rahul Rasal CCO of UpSolv and Stéphane Trépanier General Manager of NexKemia at NexKemia's Mansonville plant

We are grateful for NexKemia's confidence in our technology and for its collaborative approach to advancing innovative recycling solutions. We look forward to building a successful long-term partnership that creates lasting value for our customers, shareholders, industry partners, and the environment.

"This agreement represents a major milestone for UpSolv. It validates not only the strong product-market fit of our first-of-its-kind solution, but also the resilience, execution excellence, and cross-functional collaboration that define our team. We're proud to deliver innovative solutions that help our customers solve complex sustainability challenges," said Rahul Rasal, Chief Commercial Officer of UpSolv.
