

Krazimo Named an OpenAI Select Partner

Krazimo today announced that it has been named an OpenAI Select Partner within the OpenAI Partner Network.

NEW YORK, NY, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- Krazimo today announced that it has been named an OpenAI Select Partner within the OpenAI Partner Network.

The OpenAI Partner Network is a global program that helps partners build, sell, and deliver AI solutions with OpenAI. It brings together partners with deep industry expertise, delivery capabilities, and customer relationships, while providing the resources, enablement, and support that enterprises need to adopt OpenAI frontier models and products and translate those capabilities into measurable impact.

As an OpenAI Select Partner, Krazimo will continue working with OpenAI to help organizations build, deploy, and scale AI solutions responsibly and effectively. This work will help organizations get more useful work from every token and stronger performance per dollar with GPT-5.6, while using ChatGPT Work to turn ambitious goals into finished work. Krazimo works with clients to apply these capabilities to their specific business needs, providing support across AI strategy, product engineering, and technical implementation.

"The difference between a compelling demo and a system trusted with real work comes down to rigorous engineering: tuning the harness, building reflection loops to catch mistakes, writing evals for edge cases, and designing clear audit trails and escalation paths," said Akhil Verghese, cofounder and CEO of Krazimo.

Krazimo is an AI engineering company founded in 2023 by former Google engineers. It designs and deploys production-ready AI software, agents, and automation for organizations that need reliable performance, predictable outcomes, and measurable ROI. Five of its eight engineers previously worked alongside its founders at Google; the other three bring experience from

Amazon and Flipkart. The company is broadly sector-agnostic, with work spanning healthcare, education, insurance, restoration, financial services, construction, and sustainability. Krazimo invests time in understanding each client's domain. Clients remain the experts in their businesses, while Krazimo brings AI expertise and technical implementation. Learn more at krazimo.com.

Measured results from Krazimo's work include a 358% increase in net profit for a restoration firm; a 60% reduction in grading time for an education technology company; an approximately 80% reduction in hours spent translating technical documents for a professional translation platform; a 15-20% increase in new leads and a 30% reduction in labor time for a medical spa; and human involvement of just 2-3% for routine calls handled through an AI voice platform.

Looking ahead, Krazimo plans to expand its work with OpenAI models and products, deepen team enablement, and scale customer deployments across agentic workflows, knowledge systems, and AI-powered operations. Krazimo is moving into larger enterprise engagements and is currently discussing broader, more complex deployments with multiple enterprises, helping its clients become truly AI-native.
