

ParaSolution recognized as a High Performer on the G2 Grid® for Business Continuity Management Software

Premier Continuum's business continuity management software, ParaSolution, earns G2 High Performer recognition, backed by a 4.7/5 rating and Users Love Us badge

MONTREAL, QUEBEC , CANADA, September 3, 2026 /EINPresswire.com/ -- Premier Continuum, a Canadian business continuity and organizational resilience company, is proud to announce that ParaSolution, its business continuity software platform, has achieved High Performer status on G2 in the Business Continuity Management Software category.

ParaSolution Earns G2 Recognition

For Business Continuity Management Software in 2026

ParaSolution Earns G2 Recognition

“

Customer experience has always been central to how we develop ParaSolution”
Isabelle Primeau, President of Premier Continuum

As of September 3, 2026, ParaSolution holds an aggregated 4.7 out of 5 rating on G2 and has earned G2's Users Love Us badge, reflecting particularly strong positive user feedback on the platform.

ParaSolution's G2 High Performer Recognition Reflects Its Continuity and Resilience Expertise

G2 Grid® positioning is based on two key dimensions: Satisfaction and Market Presence. Satisfaction reflects factors derived from verified user reviews, while Market Presence considers factors related to a vendor's scale and presence within a specific software category.

For Premier Continuum, ParaSolution's positioning as a High Performer on G2 marks an important milestone in the BCM platform's growing international presence and reinforces its role as a trusted solution.

G2 reviews provide independent, prospective buyers with insight into how organizations experience the platform over time, complementing product demonstrations and technical evaluations. This type of user feedback is especially important in business continuity: a BCM platform is way more than a place to store plans. Its value comes from helping teams keep information up to date, understand relationships across continuity data, and rely on accurate, actionable information when it matters most.

“Being recognized as a High Performer on G2 is especially meaningful because customer experience has always been central to how we develop ParaSolution. Beyond providing powerful technology combined with deep BCM expertise, our goal is to give resilience professionals a platform they can rely on every day and when it matters most. Seeing that reflected in user feedback is something our entire team is proud of.”

— Isabelle Primeau, MBCI, CBCP, President and founder of Premier Continuum, and the visionary behind ParaSolution.

ParaSolution Also Earns the G2 Users Love Us Recognition

In addition to its High Performer title, ParaSolution has also earned G2’s Users Love Us badge, awarded to products with an average user rating of 4.0 stars or higher. Its aggregated 4.7 out of 5 rating as of September 3, 2026 places the platform well above this threshold and provides another indicator of strong user satisfaction.

Behind this user satisfaction is a platform designed to move organizations beyond disconnected plans and fragmented data. ParaSolution brings together business impact analyses, recovery strategies, continuity plans, dependencies, resources and contacts into a centralized environment. It also supports broader resilience activities, including business continuity, operational resilience, emergency response, crisis management, IT disaster recovery and cybersecurity management, enterprise risk management and vendor risk management. It

The image displays two promotional banners. The top banner is for Premier Continuum, featuring a dark teal background with a white circular logo on the left. The text 'PREMIER CONTINUUM' is in large white letters, with 'PROUD DEVELOPER OF PARASOLUTION' in smaller white text below it. To the right, the tagline 'Empowering Resilience Through Software, Training & Consulting' is written in white and teal. Below this, six orange-bordered boxes are arranged in a 2x3 grid, containing the following text: 'Business Continuity', 'Operational Resilience', 'Crisis Management', 'IT DR and Cyber', 'Risk Management', and 'Conformity'. At the bottom of the banner is the website 'www.premiercontinuum.com'. The bottom banner is for ParaSolution, also with a dark teal background. It features several award logos at the top: 'Users Love Us', '2026 Gartner Magic Quadrant CHAMPION', 'A LEADER IN THE GARTNER MAGIC QUADRANT', and 'BCI Americas Awards'. The main text 'Ready for What's Next?' is in large white letters, followed by 'Built for organizational resilience.' in smaller white text. Below this is a white button with the text 'Explore Our Solutions' and a right-pointing arrow. To the right of the button is a laptop displaying the ParaSolution software interface, which includes various charts and maps. At the bottom of the banner, the 'PARASOLUTION' logo is centered, with three green buttons labeled 'Software', 'Training', and 'Consulting' below it.

PARASOLUTION

Software Training Consulting

Premier Continuum presents BCM Software ParaSolution

includes ISO 22301 and IT-related standards conformity modules, helping teams better understand how critical elements of their resilience programs interact while supporting alignment with requirements and best practices. In addition, ParaSolution features an Automated Threat Monitoring and Analysis Module powered by Artificial Intelligence (AI) designed to help teams identify and assess threats.

Developed with three decades of expertise from Premier Continuum's consultants, resilience specialists, and BCI instructors, ParaSolution combines specialized software with proven practices to keep resilience information accurate, connected, and actionable as organizations evolve.

This G2 recognition adds to ParaSolution's history of independent industry recognition. The platform was recognized by Gartner in 2019 and has consistently ranked as a leader on SoftwareReviews from 2021 to 2026.
