

Extreme 3D Tic Tac Toe v1.0 released on multiple devices

How do we keep coming up with new ideas for games?

DALLAS, TX, UNITED STATES, September 9, 2026 /EINPresswire.com/ -- [Magnin & Associates](#) today introduces their new game, [Extreme 3D Tic Tac Toe](#), available on iPhone, Android, Kindle Fire, Apple TV, Mac, Windows PC and Xbox.

How do we keep coming up with new ideas for games?

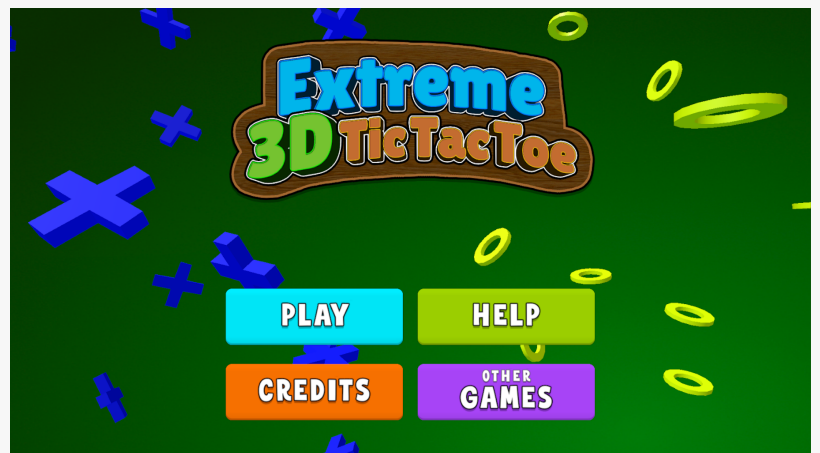

With over 60 games in the 5 major app stores, people ask us how we keep coming up with new ideas. Often it can be an entirely new concept. Other times we are able to tweak a well known type of board game, like Tic Tac Toe, to provide new features when playing it on phones, tablets, and video game consoles.

This latest version of Tic Tac Toe allows play on a 2D board in 3 different sizes: 3x3, 4x4, and 5x5. Also play on the new 3D board in two different modes: First Row and Max Rows. Both modes provide both traditional and new ways to play along with the 3 different size boards to play on.

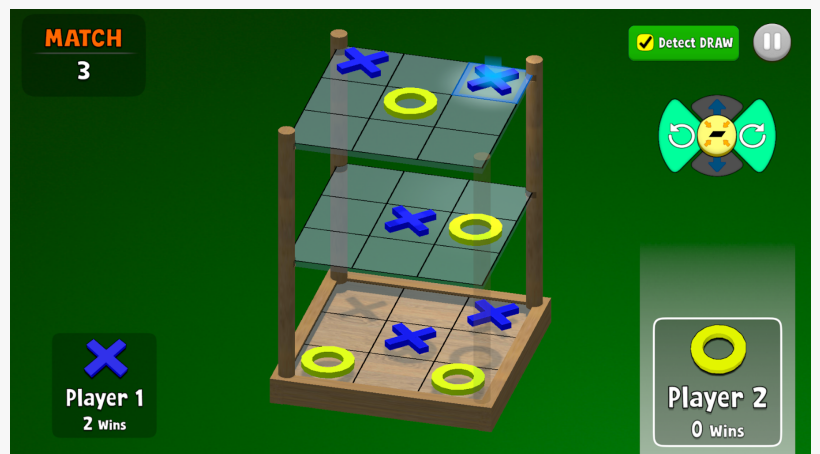

Go head to head against a computer player that makes their own moves, or play locally with another player sharing the screen.

This game features:

- 2D and 3D Tic Tac Toe boards.

Extreme 3D Tic Tac Toe title screen

Extreme 3D Tic Tac Toe screen shot

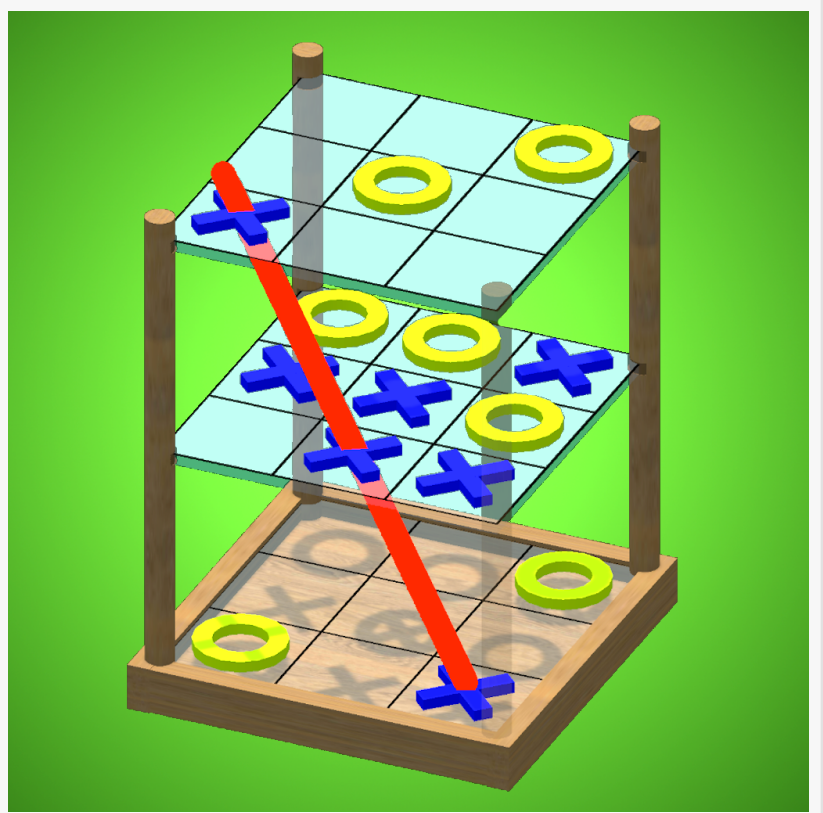

- 3 different sizes for both boards.
- 2 modes to choose from for the 3D boards.
- 2 computer player difficulties.
- The option for quick local play with a second player.

Includes extensive on screen Help.

Playing a 3D version on a phone, tablet, or game console is actually easier than trying to put pieces inside a multilayer 3D game board.

Universal App - supports iPhone, iPod Touch, and iPad, including standard, Retina, and iPhone X displays. Even runs on Apple Mac or MacBooks equipped with the new Apple's M-series Silicon chips with easy to use mouse and keyboard controls. There is also a separate version for Apple TV, available as a free download to purchasers of the iOS version.
