AI SEO Hacker Launches Affordable, KPI-Guaranteed SEO and AI Search Optimization Service, Verified Across 10 Industries

Taipei agency ties NT$10,000 monthly contracts to five KPIs, backed by a documented track record across tourism, SaaS, manufacturing, and e-commerce.

TAIPEI, TAIWAN, September 3, 2026 /EINPresswire.com/ -- AI SEO Hacker today announced the continued rollout of its SEO and Generative Engine Optimization (GEO) service, a program built around two commitments the company says are still uncommon in the industry: an affordable, transparent monthly rate and a written performance guarantee.

Rather than the 12- to 24-month retainers common among SEO agencies, AI SEO Hacker structures its first engagement as a 6-month contract priced at NT$10,000 (roughly USD $310) per month, following an initial 2-month setup phase. Five key performance indicators — covering keyword rankings, AI search visibility, organic traffic, and impression growth — are written directly into the contract. If a client does not hit at least three of the five KPIs, AI SEO Hacker provides a documented remedy at no additional cost: either an extra month of service or 15 additional SEO articles.

The company backs its claims with public, verifiable data. Across 10 client websites tracked through Google Search Console, AI SEO Hacker reports a combined 316,172 organic clicks and 11.24 million impressions, with actual click-through traffic recorded from 150 countries and regions. All nine of the assessable traffic- and impression-based KPIs tracked across those accounts were met. The client base spans industries as varied as travel agencies, local tourism operators, pet care services, plumbing and home repair, manufacturing, e-commerce, B2C and B2B SaaS platforms, and AI video production — evidence, the company says, that its methodology is not limited to a single niche.

"Most SEO agencies ask you to trust a 12-month contract and a slide deck," said Hulk Chen, founder of AI SEO Hacker. "We flipped that. Our price is public, our KPIs are written into the contract, and our case studies show the actual Google Search Console numbers -- not just the wins we want to talk about. If we don't hit the targets, the fix is free."

About AI SEO Hacker
AI SEO Hacker is a Taipei, Taiwan-based agency specializing in SEO and Generative Engine Optimization (GEO) -- helping businesses rank in both traditional Google search and AI answer engines such as ChatGPT, Perplexity, and Google AI Overview. The company publishes its client results, KPI definitions, and methodology at https://ai-seo-hacker.cc.
