

Constar Technology Group Expands Contact Lens OEM Services for Saudi Arabia with SFDA-Compliant Manufacturing

BAIYIN, GANSU, CHINA, September 4, 2026 /EINPresswire.com/ -- FDA and CE certified [contact lens manufacturer](#) offers private label contact lenses, custom contact lens OEM production, and wholesale contact lens supply for the Saudi Arabian and Middle East optical market

Constar Technology Group, a leading contact lens manufacturer and contact lens OEM supplier with over 40 years of industry experience, today announced the expansion of its [OEM contact lens services](#) for Saudi Arabia, targeting the rapidly growing Saudi and Gulf Cooperation Council (GCC) optical market.

With Saudi Arabia's contact lens market experiencing double-digit annual growth driven by Vision 2030 healthcare modernization, rising disposable incomes, and increasing demand for colored cosmetic contact lenses among the Kingdom's young population, Constar Factory is positioned to serve Saudi contact lens distributors, optical retail chains, hospital procurement departments, and private label brand owners seeking SFDA-registered contact lens products for the Saudi market.

SFDA Compliance and Saudi Arabia Contact Lens Import Requirements

Constar Factory holds FDA 510(k) clearance, CE MDR certification, and ISO 13485 quality management registration — the three primary certifications recognized by the Saudi Food and Drug Authority (SFDA) for medical device registration in Saudi Arabia. The company's complete contact lens OEM service includes pre-prepared documentation packages designed to expedite SFDA MDMA registration, the mandatory Medical Device Marketing Authorization required for all contact lenses sold in the Kingdom.

"Saudi Arabia represents one of the fastest-growing contact lens markets in the Middle East,"

said a Constar Factory spokesperson. "With Vision 2030 driving healthcare infrastructure development and a population where over 60% are under 35, the demand for both prescription contact lenses and cosmetic colored contact lenses is surging. Our FDA and CE certifications provide Saudi importers with the regulatory foundation needed for fast SFDA registration."

The company's SFDA compliance documentation includes biocompatibility test reports per ISO 10993, sterilization validation records, technical documentation per EU MDR requirements, quality management system certificates, and free sale certificates from the country of origin — all essential files for Saudi contact lens import and SFDA medical device registration.

Low MOQ Contact Lens OEM for Saudi Distributors

Unlike traditional contact lens factories requiring large-volume orders, Constar Factory offers minimum order quantities (MOQ) starting at just 1,000 pairs per design, making it accessible for Saudi Arabian contact lens distributors, optical shop owners, and new contact lens brand entrepreneurs to enter the market with manageable inventory investment. This low MOQ contact lens OEM approach is particularly valuable for Saudi importers testing new product lines or launching private label contact lens brands.

The company provides complete OEM contact lens services for the Saudi market:

- Custom contact lens design — Multiple base curves, diameters, and water content options suitable for Middle Eastern eye anatomy
- Private label contact lens packaging — Full custom box design with Arabic and English bilingual labeling
- SFDA-compliant labeling — Arabic-language product information meeting Saudi regulatory requirements
- Colored contact lens OEM — Over 200+ color designs popular in Saudi and GCC markets
- Daily disposable lens OEM — HEMA and silicone hydrogel materials for the growing daily lens segment
- Toric and multifocal lenses — Corrective lenses for astigmatism and presbyopia
- Brand registration support — SFDA MDMA application assistance

Full contact lens OEM pricing, product specifications, and MOQ details are available at <https://www.constarfactory.com/contact-lens-oem-moq-constar/>

Saudi Arabia Contact Lens Market: Vision 2030 Growth Opportunity

The Saudi Arabian contact lens market is experiencing unprecedented growth, driven by several key factors that create significant opportunities for contact lens importers and distributors:

- Vision 2030 healthcare modernization — Saudi Arabia investing \$65 billion in healthcare infrastructure, expanding optical retail channels and eye care clinics across the Kingdom
- Young population demographics — Over 60% of Saudi Arabia's 36 million population is under

35, creating strong demand for fashion-colored contact lenses and cosmetic plano lenses

- Rising disposable incomes — Saudi GDP per capita exceeding \$30,000 drives premium contact lens purchasing power
- Growing optical retail sector — Major chains like Al-Hayat Optical, Bin Sulaiman, and Dr. Optic expanding across Saudi cities
- E-commerce growth — Online contact lens sales growing at 25% annually in Saudi Arabia, particularly for colored contact lenses
- Mega-event demand — NEOM, Red Sea Project, and FIFA World Cup 2034 preparation driving retail and hospitality sector growth

The Saudi contact lens market is projected to exceed \$500 million by 2030, with colored cosmetic lenses representing the fastest-growing segment at 12% annual growth. Daily disposable contact lenses are also gaining rapid adoption, mirroring global trends toward convenience and hygiene.

Complete Contact Lens Import Documentation for Saudi Arabia

Every shipment from Constar Factory includes the full suite of contact lens import documents required for Saudi Arabia market entry:

- FDA 510(k) Clearance Letter — US FDA device clearance documentation
- CE Certificate (MDR) — EU Medical Device Regulation compliance
- ISO 13485 Certificate — Quality management system certification
- Certificate of Analysis (COA) — Batch-specific quality test results
- Certificate of Compliance (COC) — Manufacturing standards compliance
- Biocompatibility Test Reports — ISO 10993 cytotoxicity, sensitization, and irritation
- Sterilization Validation — EtO sterilization cycle validation records
- Technical Documentation — Complete design dossier per EU MDR requirements
- Free Sale Certificate — Certificate from country of origin
- Product Master File — SFDA-ready device master file

Saudi importers receive all files needed for SFDA medical device registration, Saudi Customs clearance, and post-market surveillance compliance. For a complete step-by-step guide on how to import contact lenses to Saudi Arabia, Constar Factory has published a comprehensive [SFDA compliance guide](https://www.constarfactory.com/how-to-import-contact-lenses-to-saudi-arabia/) at <https://www.constarfactory.com/how-to-import-contact-lenses-to-saudi-arabia/>

Middle East Contact Lens Distribution Partnership

Constar Factory is actively seeking contact lens distribution partners across Saudi Arabia, including:

- Riyadh — Capital city with highest concentration of optical retailers
- Jeddah — Major commercial hub and gateway to Mecca pilgrimage market
- Dammam/Eastern Province — Oil industry workforce with strong purchasing power
- NEOM and new cities — Emerging retail opportunities in Vision 2030 mega-projects

The company supports Saudi partners with Arabic-language marketing materials, SFDA registration coordination, product training, and ongoing regulatory support. Constar Factory also supplies contact lenses to distributors across the wider GCC region, including UAE, Kuwait, Bahrain, Qatar, and Oman, enabling regional distribution hub strategies.

About Constar Factory: 40 Years of Contact Lens Manufacturing Excellence

Constar Factory is a Hong Kong-based contact lens manufacturer established in 1986, specializing in OEM and ODM contact lens production for global markets. The company holds FDA 510(k) clearance, CE MDR certification, and ISO 13485 registration, making it one of the few contact lens factories in Asia with simultaneous access to US, European, Middle Eastern, and international markets.

Constar Factory supplies contact lenses to distributors, optical chains, hospitals, online retailers, and private label brand owners in over 40 countries worldwide, with established partnerships across the Middle East and GCC region. The company manufactures over 15 million contact lenses per month and offers the full spectrum of lens types including clear contact lenses, colored contact lenses, daily disposables, monthly lenses, toric lenses, multifocal lenses, and cosmetic plano lenses.
