

Macau Ke Hon Technology Launches Kehon Ring for Global B2B Buyers

Screenless wellness ring with UK-registered brand, Macau fulfilment and a lifetime zero-subscription model for corporate gifting and luxury wholesale.

MACAO, MACAO, September 4, 2026 /EINPresswire.com/ -- Macau Ke Hon Technology Co., Ltd.

“

Most wearables ask the customer to keep paying for data that already sits on their own body. We built KEHON RING as a finished product with zero subscription fees."

*Kingston Yeh, Founder of
Macau Ke Hon*

today opened global B2B wholesale, enterprise customisation and channel distribution for [KEHON RING](#), its flagship [screenless wellness wearable](#). The company operates from Macau under its UK-registered brand and is targeting distributors, boutique retailers, high-end car clubs and corporate gifting buyers, supported by a premium tech-retail network in Macau.

KEHON RING is positioned as a jewellery-grade accessory with ambient wellness tracking. The casing uses an aerospace-grade titanium alloy structure and weighs 3.6 grams. Instead of conventional decorative electroplating,

the company specifies a watchmaking-grade PVD classic gold finish intended for daily wear, scratch resistance and hypoallergenic contact. Design direction is anchored by the company's UK brand asset, while final quality assurance and global outbound logistics are handled from its Macau headquarters. The commercial offer is built around a lifetime [zero-subscription](#) fee. Buyers receive the hardware and core wellness insights without a monthly software charge. Macau Ke Hon Technology said this structure is intended to improve conversion and protect distributor margin in channels where recurring fees often reduce repeat orders.

On the tracking side, KEHON RING uses a high-precision biometric architecture for non-medical lifestyle insights, including silent sleep-stage tracking, heart-rate variability (HRV) recovery trends and blood-oxygen trend analysis. The company states that exported units carry CE, FCC and RoHS certifications and are sold strictly as non-medical wellness wearables.

"Most wearables ask the customer to keep paying for data that already sits on their own body," said Kingston Yeh, founder of Macau Ke Hon Technology. "We built KEHON RING as a finished product: British design, Macau quality control, and no subscription locked behind the hardware. That is the offer we are taking to wholesale partners."

Macau Ke Hon Technology is an official member of the Macao Young Entrepreneur Incubation Centre (MYEIC) and is using Macau as its export and quality-control base for cross-border B2B fulfilment. International wholesale, enterprise customisation and channel enquiries are now open through the company's official site at kehontech.com.
