# AlmaLinux OS Foundation Infrastructure Team Lead To Speak at DevOpsDays 2026

AlmaLinux

FORT MYERS, FL, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- The AlmaLinux OS Foundation, a nonprofit that stewards the community-owned and governed open source enterprise Linux distribution AlmaLinux OS, today announced that Jonathan Wright, infrastructure team lead, is set to speak during DevOpsDays 2026 taking place September 8-10 at the Smith Memorial Student Union in Portland, Oregon.

From 9:10 to 9:55 a.m. on Thursday, September 10, Wright is scheduled to participate in the “New Linuxes Panel” alongside leads from Microsoft Linux, Talos Linux and Bluefin/GNOME OS. More than three decades after the first Linux distribution was created, hundreds of distributions remain actively maintained, with new distributions continuing to emerge to address evolving technical challenges, use cases and user needs. During the discussion, panelists are set to share the purpose behind their respective distributions, the problems they aim to solve and how their approaches differ. Attendees will also have the opportunity to ask questions and learn more about how different distributions are designed to meet the needs of different users and organizations.

Jonathan Wright is the Infrastructure Team Lead for the AlmaLinux OS Foundation and a member of the AlmaLinux Engineering Steering Committee (ALESCo). He brings more than 15 years of experience building infrastructure in the web hosting industry and has been actively involved in open source communities, including AlmaLinux, Fedora and EPEL.

For more information on Wright’s session, visit:

About AlmaLinux OS
AlmaLinux OS is an open source, community-governed, and forever-free enterprise Linux

distribution focused on long-term stability and delivering a robust production-grade platform. Distributed from a network of over 400 mirrors across six continents, AlmaLinux is compatible with RHEL(r) and pre-Stream CentOS, and powers projects for governments, the defense sector, and scientific research institutions as well as numerous global business sectors and the web hosting industry. Adopted by some of today's foremost open source ecosystem projects such as VMware, GitLab and Tenable, it's available on all major public cloud platforms including AWS, Azure, Google Cloud, and Oracle OCI. The AlmaLinux OS Foundation is a 501(c)(6) non-profit entity created as the central collaboration point for everything to do with AlmaLinux and for the benefit of the AlmaLinux OS community.
