Dell Laser Consultants Named Best LASIK Provider in Best of Austin for Fourth Consecutive Year

AUSTIN, TX, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- Dell Laser Consultants has been named a Best LASIK Provider in the Best of Austin awards for the fourth consecutive year, recognizing the Austin-based practice for its continued commitment to advanced vision correction and patient care.

The consecutive recognition reflects Dell Laser Consultants' longstanding presence in the Austin community and its focus on providing patients with personalized vision correction options. The practice combines advanced technology, experienced physicians, and individualized treatment planning to help patients find the approach that best fits their eyes, lifestyle, and long-term vision goals.

"We are incredibly honored to receive this recognition for the fourth year in a row," said Steven J. Dell, MD, Medical Director of Dell Laser Consultants. "Our patients place an enormous amount of trust in us when they choose us for their vision care, and that is something we never take for granted. We are grateful to our patients and our entire team for making this recognition possible."

Dell Laser Consultants offers a comprehensive range of Modern Vision Correction options, including LASIK, PRK, ZEISS SMILE PRO, EVO ICL, and Refractive Lens Exchange. The practice takes a customized approach to determining candidacy, considering factors such as prescription, eye health, corneal anatomy, age, lifestyle, and individual vision goals.

That personalized approach is supported by a long history of innovation in refractive and cataract care. Dell Laser Consultants has been an early adopter of advanced ophthalmic technologies and offers a broad range of premium intraocular lenses and advanced treatment

options for patients undergoing cataract surgery and refractive lens procedures.

The practice also provides subspecialty care for dry eye, glaucoma, keratoconus, and other corneal conditions. Its Dell Eye Institute for Dry Eye Research uses advanced diagnostic testing and treatment protocols, while its glaucoma program takes a proactive approach, including laser and minimally invasive surgical options when appropriate.

Dell Laser Consultants' physicians are active in research, education, and leadership within the ophthalmology community. Dr. Dell is internationally recognized for his contributions to refractive and cataract surgery and was selected as the 2026 Steinert Lecturer at ASCRS Refractive Day, where he presented "The Evolution of Refractive Surgery: From Fringe to Forefront."

For Dell Laser Consultants, the fourth consecutive recognition represents more than an award. It reflects the trust patients place in the practice and its continued commitment to advancing the standard of vision care in Central Texas.

"We have always believed that patients deserve to be treated the way we would want our own family members to be treated," said Dr. Dell. "We will continue to invest in technology, research, and education while keeping the patient at the center of every decision."

Dell Laser Consultants serves patients throughout Austin and Central Texas from its Austin location, with an additional clinic in Bastrop providing cataract and glaucoma care to communities east of Austin.
