EarFun Unveils Wave Pro X at IFA 2026, Redefining the Premium Wireless Audio Experience

EarFun's new flagship over-ear headphones combine Dual-Coaxial architecture, Qualcomm™ ANC and extended battery life in a premium wireless design.

EarFun Unveils Wave Pro X at IFA 2026, World's First Dual-Coaxial Headphones with Qualcomm® ANC and Auracast™.

BERLIN, GERMANY, September 4, 2026 /EINPresswire.com/ -- EarFun, a fast-growing wireless audio brand, today announced the global launch of the Wave Pro X, its new flagship over-ear headphones, at IFA 2026. Designed to push the boundaries of wireless listening, the Wave Pro X combines EarFun's latest acoustic architecture, active noise cancellation, intelligent processing, and long-lasting battery performance in a refined over-ear design.

Introducing The EarFun Wave Pro X
The EarFun Wave Pro X represents EarFun's latest step in advancing premium wireless audio, positioned as the world's first Dual-Coaxial Qualcomm™ ANC over-ear headphones featuring two independent drivers tuned for maximum sonic richness. These headphones deliver unparalleled spatial awareness, deep bass, and crisp highs. Perfectly suited for discerning listeners who demand both comfort and performance.

Engineered with DCAA™ Acoustic Architecture, the headphones feature custom dual dynamic drivers and high-purity voice coils that deliver expansive soundstage fidelity, where every note resonates with clarity and depth. An advanced 8-microphone array paired with real-time AI processing powers the Hybrid Active Noise Cancellation system, which intelligently adapts to its environment to eliminate background noise without distorting the music.

With up to 90 hours of playback (50 hours with ANC on), and ultra-fast charging in just 15 minutes for 10 hours of playback, the Wave Pro X offers exceptional battery endurance. Its lightweight, foldable design features cloud-soft memory foam earcups for extended use, while

supporting multi-point Bluetooth switching and a wired 3.5mm hi-res bypass for audiophiles who prefer direct analog connectivity.

A New Flagship for EarFun

The launch of Wave Pro X marks an important milestone in EarFun's evolution from an accessible wireless audio brand toward a broader premium audio portfolio.

"Wave Pro X represents what we believe wireless headphones can deliver when acoustic engineering, intelligent technology, and thoughtful design come together," said White Wang, CEO of EarFun. "Our goal was not simply to add more technology, but to create a more complete listening experience—from sound and noise cancellation to comfort, connectivity, and battery life."

With its combination of dual-coaxial architecture, advanced noise cancellation, extended battery endurance, and flexible wired and wireless connectivity, the Wave Pro X is designed for listeners who want both performance and versatility from their everyday headphones.

Previewing Next-Gen Flagship: Air Pro 5

Alongside the Wave Pro X launch, EarFun is also unveiling its first official preview of the upcoming flagship Air Pro 5 true wireless earbuds. Meticulously designed and engineered by EarFun, these new TWS earbuds feature a refined sound signature, with advanced noise cancellation and seamless connectivity. To enhance the active noise cancellation (ANC) performance of the EarFun Air Pro 5, EarFun consulted with engineers from Bose Corporation's Audio Technology business, which provided acoustic engineering services including ANC modeling, tuning and validation. Audiophiles will appreciate its precise tuning, balanced frequency response, and intelligent adaptive processing, while enjoying industry-leading noise-cancellation performance.

Further details on the Air Pro 5 will be announced by EarFun at a later date.

Pricing & Availability

The flagship EarFun Wave Pro X is available now worldwide through EarFun's official website and Amazon store for €149.99 / $129.99 / £119.99.

About EarFun

EarFun, an audio brand established in California in 2018, is run by an experienced group of industrial designers, acoustic engineers and music enthusiasts who shared the goal of creating next-generation wireless audio devices. The EarFun team is driven by a passion for music and a commitment to delivering solutions that use the latest technology to improve sound for wireless audio products. With five Red Dot Design awards, two CES Innovation Awards, and IF Design

Award Honorees, EarFun is a fast-growing brand.
