

Lantern Post Launches a Free Greeting Card With a Verified Surprise Inside

The free digital card hides a verified song, video or story behind a glowing lantern. Recipients need no account or app, and are not tracked

KANSAS CITY, MO, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- PIGENAI LLC today announced the general availability of Lantern Post (lanternpost.app), a free digital greeting card with a verified surprise inside. A sender hides a song, a video, a story or a place behind a glowing lantern; the recipient taps the lantern to open it. [Three steps, about a minute.](#) There is no account, no app, and nobody is tracked.

Lindsay Hiebert, founder of Lantern Post, smiling at dusk and holding a glowing paper lantern, beside the headline The free greeting card with a surprise hidden inside

“

A feed scrolls past you. A lantern waits for you. We built Lantern Post so one person could hand one other person a moment that was chosen, sealed, and verified — and completely free.”

*Lindsay Hiebert, Founder,
PIGENAI LLC*

There is a song, or a video, or a story that says it better than you could — and nowhere to put it.

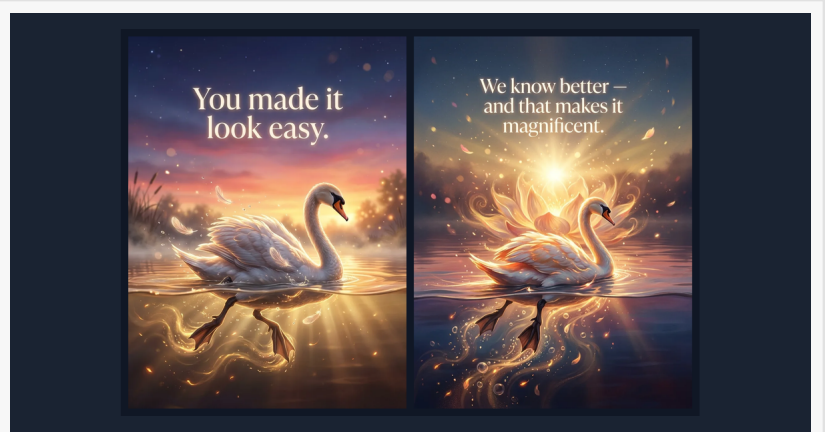

The words are already written. A sender picks a card — for a birthday, a thank-you, a hard week — each with original artwork and a two-part sentiment, a hook on the front and a warm twist inside. They can choose the one that fits or type a word and let the composer find one. Nobody faces a blank page.

Behind the lantern, the sender hides the reveal, chosen from a pre-verified library or pasted from a trusted home and verified on the spot. Then a line inside that only the

recipient would understand, and a P.S. that waits under the reveal. Those words are the sender's own; Lantern Post never writes them.

The sender previews the card exactly as it will arrive — including the song — and then lights it. Every reveal is verified before it is hidden: resolved to its final destination, matched against a strict allowlist of well-known homes, and screened with Google Cloud Web Risk. Each tap checks the card again.

Then the sender sends the link themselves, however they already talk to that person — by text, by email, through a messaging app, or printed as a scannable QR code. Lantern Post never emails the recipient, and never asks who the card is for.

A Lantern Post card: the hook on the front, the warm twist inside. Card artwork and sentiments are created with AI and reviewed by hand.

What arrives is a link and a lantern. No app, no sign-in, nothing to install. The recipient taps, light breaks across the screen in a burst that is never the same twice, and what was hidden is waiting underneath. On song cards a 30-second preview plays on the card itself, before anyone decides whether to continue to a music service.

Nothing about the recipient is kept — no address, no name, no account. Lantern Post sets no tracking pixels and sends no read receipts. It counts only whether a card was opened and whether a lantern was tapped, and it does not read the sender's words. As the product's privacy page puts it: it counts lanterns, not lives.

Anyone holding a card can put it out at any time — the sender, the recipient, or anyone it was forwarded to. The link stops working and the words are erased, for everyone, permanently. Otherwise a card stays lit: Lantern Post sets no expiration timer of its own. Permanent by default, ephemeral the moment anyone decides it should be.

Then the recipient can pass the light on. One tap starts a card of their own — free, no account.

"A feed scrolls past you. A lantern waits for you. We built Lantern Post so one person could hand one other person a moment that was chosen, sealed, and verified — and completely free," said Lindsay Hiebert, Founder of PIGENAI LLC.

The first Lantern Posts are already traveling. One was made for a Kansas City gate agent whose 4 a.m. kindness became the product's launch essay, and readers can [open a live example card](#) exactly as a recipient would.

Lantern Post is free to send and free to receive, with no membership fee and no paywall

between a recipient and their card. Anyone can [send a free digital greeting card](#) today at lanternpost.app.

About the Founder

Lantern Post was created by Lindsay Hiebert, CISSP, founder and CEO of PIGENAI LLC. A serial entrepreneur, Hiebert builds applications across AI governance, security, answer engine optimization (AEO), networking and education — products aimed at the 21st-century skills the Intelligence Era demands. Hiebert spent 15+ years at Cisco Systems and 7+ years at Intel Corporation, including as Senior Product Manager, AI / Network and Edge, and is the author of 12+ books on Amazon KDP, including The Wick of Wit — the collection several Lantern Post sentiments draw from.

About Lantern Post

Lantern Post is a free digital greeting card with a secret inside: a sender lights a card and hides a verified reveal — a song, a story, a verse, a video, or something to read — and the recipient taps a glowing lantern to open it. Recipients need no account or app. Reveal destinations are checked before sending and re-checked when opened. Learn more at lanternpost.app.

About PIGENAI LLC

PIGENAI LLC is a Missouri limited liability company founded by Lindsay Hiebert, CISSP. The company operates Lantern Post.
