

Keystone Shed Repair LLC publicly launches shed-only repair service in Southeast Pennsylvania

Keystone Shed Repair LLC launches in Douglassville, PA, offering shed roof, siding & carpentry repairs across Berks, Montgomery, Chester & Lehigh counties, PA.

DOUGLASSVILLE, PA, UNITED STATES, September 6, 2026 /EINPresswire.com/ -- Keystone [Shed Repair](#) LLC, a specialized home-services company that works exclusively on sheds, announced its public launch to homeowners across Berks County and surrounding counties in Southeast Pennsylvania. Based in Douglassville, the company is designed for a common problem. Sheds take a beating from weather and time, but most home-service providers either don't focus on sheds or prefer larger remodeling projects.

Keystone Shed Repair's "Don't Replace — Repair" approach emphasizes restoring what homeowners already have. Rather than pushing replacement, which can involve removal, delivery logistics, site preparation, and disruption to a yard, the company helps customers evaluate what can be repaired, what should be upgraded, and what will protect the shed and what's inside it for years to come.

The company offers a full set of shed services available today, including roof repair and replacement, siding repair, door and window repair or replacement, floor repair, painting, and general shed carpentry and restoration.

Keystone Shed Repair works with homeowners as well as property managers and HOAs that

need dependable repairs for shared storage buildings. With a shed-only focus, customers get practical guidance on what to repair now, what to upgrade, and how to prevent small issues from becoming costly damage.

Keystone Shed Repair is fully insured and currently scheduling projects about two weeks out. Work is completed primarily by employees, supported by vetted independent contractors. All technicians are experienced, licensed, insured, and background-checked.

“Your shed should be maintained as well as your house but who do you call when your shed needs a new roof?” said founder Brian Welch. “Keystone Shed Repair was launched to do the work that most larger remodelers don’t want to bother with. We’re specialists, and we’re here to keep good sheds standing strong. Don’t Replace — Repair.”

Keystone Shed Repair serves Berks County and surrounding counties in Southeast Pennsylvania, including Montgomery, Chester, and Lehigh counties. The company was founded on January 1, 2026, with marketing and customer outreach beginning in mid-February.

Welch is a longtime Berks County resident and serial entrepreneur. Before launching Keystone Shed Repair, he owned SuperHeroStuff, an e-commerce company formerly based in Sinking Spring, and he also owned Amity Digital, a digital marketing agency based in Douglassville. That background shaped the company’s customer-first experience, from clear service descriptions to straightforward scheduling and communication.

In addition to local service, Keystone Shed Repair is committing to community support by donating 10% of its profit to local community organizations.

About Keystone Shed Repair LLC

Keystone Shed Repair LLC is a Douglassville, Pennsylvania-based [shed repair company](#) serving Berks County and surrounding counties in Southeast Pennsylvania. The company specializes exclusively in shed repairs and improvements, helping homeowners protect their investment, improve curb appeal, and keep storage spaces safe and functional. Homeowners can request a no-pressure quote online, share photos and a description of the issues, and schedule work with a shed-focused team.
