

Morningblues Record R1 by Wuxi Future Mirror Display Technology Co., Ltd. Wins Gold A' Design Award

Vinyl Inspired Speaker Blending High Fidelity Sound with Dynamic Visuals Recognized in Audio Equipment Awards

COMO, CO, ITALY, September 7, 2026 /EINPresswire.com/ -- The A' [Design Award](#) has announced [Morningblues Record R1](#) by [Wuxi Future Mirror Display Technology Co., Ltd.](#) as a Gold winner in the Audio and Sound Equipment Design category. The A' Design Award is one of the world's most prestigious recognitions in the field of design, organized as an international and juried competition that evaluates entries through a blind peer review process. This distinction within the audio products field highlights designs that demonstrate notable innovation and meaningful value for their intended audiences. The

recognition places Morningblues Record R1 among a selection of works acknowledged for their thoughtful contribution to the audio and sound equipment industry. Wuxi Future Mirror Display Technology Co., Ltd. now holds a respected position among the laureates of this highly regarded program.

The A' Audio and Sound Equipment Design Award holds relevance for the broader industry and for individuals who value refined living spaces. Morningblues Record R1 responds to a growing interest among modern users who seek products that engage more than a single sense. By merging high resolution audio with dynamic visual presentation, the design aligns with emerging trends that treat music as a multidimensional experience rather than a purely passive auditory signal. This approach advances established practices within audio products by broadening the role of the speaker within the home. For users and stakeholders alike, the work offers both

practical functionality and an enriched emotional connection to music.

Morningblues Record R1 mimics the classic form of vinyl records, evoking the rich music culture and collective memories associated with them. The design pairs an anti glare high definition screen that maintains clear and comfortable visuals across varying indoor lighting conditions with a Hi Fi sound system professionally tuned by Jamo, delivering high resolution and low distortion sound. A composition of black fabric, walnut wood, and matte black plastic creates a harmonious contrast in texture, lending the product an understated elegance that integrates naturally into diverse home settings. The result transforms music into a form of spatial art that can be seen, felt, and experienced. This audiovisual synergy distinguishes the work through its considered balance of form, material, and interface arrangement.

The Gold A' Design Award recognition may inform the future direction of Wuxi Future Mirror Display Technology Co., Ltd., encouraging continued exploration at the intersection of sound, visual technology, and emotional resonance. The achievement reinforces the brand's commitment to sustainable production, reflected in recyclable materials, low standby power consumption below 0.5 watts, and eco friendly packaging. This acknowledgment serves as motivation for the design team to pursue further innovation in audiovisual experiences. It also offers a reference point for ongoing development across the brand's portfolio.

Team Members

Morningblues Record R1 was developed by the design team at Wuxi Future Mirror Display Technology Co., Ltd., with contributions from Jian Zhang, Hanjing Cai, and Yuankuo Xu, who collaborated on the form design, material selection, and interface arrangement that define the work.

About Wuxi Future Mirror Display Technology Co., Ltd.

Operating under the Morror Art identity, Wuxi Future Mirror Display Technology Co., Ltd. is dedicated to the field of audiovisual sound systems, creating speaker products that integrate intelligence, aesthetics, and emotion for users. Guided by the core concept of a shared audiovisual experience, the company merges sound quality with dynamic visual presentation, allowing music to transcend auditory perception and express the emotion and story of melodies through rhythmic light, shadow, and color. Morror Art redefines the music experience, giving shape to sound and visibility to emotion, achieving resonance between technology and art. The company is based in China.

About the Gold A' Design Award Recognition

The Gold A' Design Award is granted to designs that demonstrate a high level of innovation and a

meaningful impact on their intended audience. Within the Audio and Sound Equipment Design category, evaluation considers criteria such as innovative sound quality, user interface design, aesthetic appeal, ergonomic functionality, technological advancement, material selection, environmental sustainability, and cultural significance. Recognized as a notable achievement by the A' Design Award, Gold winning designs reflect a visionary approach and considerable skill on the part of their creators. These works serve as benchmarks for excellence, encouraging further innovation and offering reference points for future designers. The designation is reserved for designs assessed as highly capable across both technical and artistic dimensions.

About A' Design Award

The A' Audio and Sound Equipment Design Award is an internationally recognized competition that welcomes a range of participants, including sound equipment designers, design agencies, companies, manufacturers, and brands. Entries are evaluated through a blind peer review process by a world class jury panel composed of design professionals, audio products industry experts, journalists, and academics, who assess each submission against pre-established criteria. The ultimate aim of the A' Design Award is to recognize and promote superior products and projects that advance and benefit society, driven by a philanthropic mission to enhance the world through the power of good design. Organized since 2008 and now in its 18th year, the A' Design Award is an international and juried competition open to entries from all countries and across all industries.
