İSTANBUL, TURKEY, September 7, 2026 /EINPresswire.com/ -- Atlas Ego, an independent software developer focused on web systems, automation and digital products, is expanding a growing portfolio of software projects designed to simplify everyday digital tasks and streamline online workflows.

Under the Atlas Ego brand, multiple projects are being developed and maintained across different areas of software and web technology.

> My goal is not to add more features, but to build simple, reliable systems that reduce friction and make everyday digital tasks easier.”

Among the current projects is **OnlyTools**, a multilingual web-based platform that brings together a variety of tools for working with images, videos, audio files and PDFs. The platform is designed to reduce the need for users to switch between multiple websites for simple digital tasks and focuses on fast, accessible and straightforward usage.

Another project, **OnlyInsta**, is a web-based tool created for working with publicly accessible Instagram Reels content. The project focuses on simplifying the process of viewing and downloading publicly available Reels through a clean web interface.

Atlas Ego is also developing **OnlyFast**, a WhatsApp-focused management and automation system designed around session management, connection processes and bot infrastructure.

The broader goal behind these projects is to create practical software products that prioritize

usability, maintainability and efficient workflows rather than unnecessary complexity.

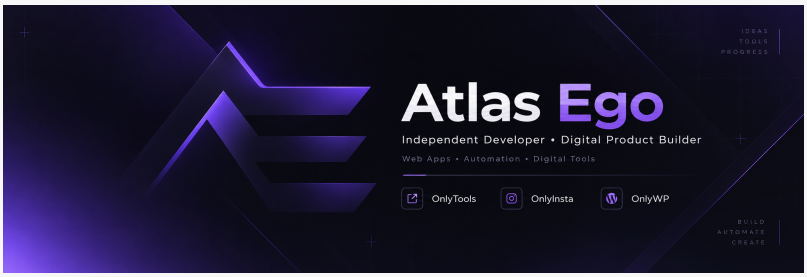

“I prefer building systems that solve a clear problem and remain easy to use,” said Atlas Ego. “The goal is not simply to add more features, but to create tools that reduce friction and make common digital processes easier.”

Development across the product portfolio is ongoing, with new features, technical improvements and additional tools planned over time.

Atlas Ego also publishes selected technical documentation, public development resources and project information through GitHub, while updates about new products and releases are shared through official Atlas Ego channels.
