# CMCE Certification Offers Core, Advanced, and Specialty Medical Courier Training

*The 14-course online program combines medical courier compliance, specialty transportation, driver safety, and business development training*

PROSPER, TX, UNITED STATES, September 10, 2026 / EINPresswire.com/ -- MedicalCourierCertification.net has launched the Certified Medical Courier Expert, or CMCE, certification program, an online training program created for medical courier business owners, owner-operators, and entrepreneurs preparing to start or expand a medical delivery company.

The CMCE program includes 14 courses covering the compliance, safety, transportation, and business responsibilities involved in operating a medical courier service.

Students who successfully complete the program earn two credentials:

1. Certified Medical Courier Professional, or CMCP
2. Certified Medical Courier Expert, or CMCE

The first 12 courses fulfill the requirements for the CMCP credential. Two additional courses expand the training into highway driver responsibilities and medical courier business development. Students enrolled in CMCE do not need to purchase the CMCP program separately.

“Medical courier business owners must understand more than pickups and deliveries,” said a representative of MedicalCourierCertification.net. “They may also be responsible for protecting patient information, overseeing drivers, managing specialized shipments, responding to incidents, serving healthcare clients, and building reliable business systems. CMCE brings these responsibilities together in one organized program.”

Core, Specialty, and Advanced Training

The CMCE curriculum includes core training in HIPAA, OSHA Bloodborne Pathogens, OSHA Hazard Communication, specimen handling, cybersecurity, workplace conduct, and fire safety.

Specialty transportation courses address:

1. Radiopharmaceuticals and hazardous drugs
2. Dry ice shipments under UN1845
3. DOT hazmat employee responsibilities
4. UN3373 Biological Substance, Category B shipments

The advanced portion includes DOT Hazmat Employee and Highway Driver Training and the Medical Courier Business Builder course.

The Business Builder provides approximately six hours of business development education and more than 70 templates and resources. Topics include service planning, pricing, operating costs, client outreach, proposals, driver onboarding, incident documentation, standard operating procedures, and business growth.

Designed for Medical Courier Business Owners

1. CMCE is intended for:
2. Current medical courier business owners
3. Medical courier owner-operators
4. Individuals planning to start a courier company
5. Independent contractors moving into business ownership
6. Delivery companies expanding into healthcare logistics
7. Experienced couriers seeking business development training

The program helps owners better understand the expectations they may face when serving hospitals, laboratories, physician offices, pharmacies, imaging centers, blood banks, research facilities, and other healthcare organizations. It also reinforces the importance of creating clear procedures for patient privacy, package security, specimen integrity, delivery documentation, driver communication, emergency response, and incident reporting.

One Program, Two Credentials

After completing all 14 courses, graduates receive both the CMCP and CMCE credentials. The CMCP credential recognizes completion of the core and specialty medical courier curriculum. The CMCE credential recognizes completion of the full advanced program, including highway driver and business development training. The two-credential structure allows graduates to document both their medical courier training foundation and their completion of a more advanced program designed for business ownership and operational leadership.

Pricing and Availability
The complete 14-course CMCE certification program is available online for $249.

Enrollment includes:
1. All 14 online courses
2. The CMCP credential
3. The CMCE credential
4. The Medical Courier Business Builder
5. More than 70 business templates and resources

Program information and enrollment are available at www.MedicalCourierCertification.net

About MedicalCourierCertification.net

MedicalCourierCertification.net provides online training and professional credential programs for medical courier drivers, independent contractors, owner-operators, and business owners. Its programs focus on the privacy, safety, transportation, workplace, and business responsibilities involved in delivering patient specimens, biological materials, medications, healthcare information, and other medical shipments.
