

Compliance Group Launches CG Learning Academy for Life Sciences

The new platform delivers practitioner-developed education in modern assurance, validation, and AI governance for pharma and medical devices organizations.

LIBERTYVILLE, IL, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- [Compliance Group, Inc.](#)

“

Companies are being asked to adopt new technologies without compromising patient safety & regulatory compliance, CG Learning Academy gives practical education to meet it with confidence.”

*Khaled Moussally, EVP
Managing Partner,
Compliance Group.*

announced the launch of CG Learning Academy, a professional learning platform built for life sciences organizations navigating evolving regulatory requirements and emerging technologies.

The Academy translates Compliance Group's industry experience into specialized, interactive microlearning programs that professionals can apply directly to daily activities performed in regulated environments.

The Academy's first release, the Modern Assurance Program, is a set of 30+ lessons that includes two courses: General Software Quality & Validation and [CSA & AI Governance](#). General Software Quality and Validation

establishes a practical foundation in validation concepts, lifecycle expectations, roles, controls, and deliverables throughout the GxP life cycle. CSA & AI Governance builds on that foundation with risk-based assurance principles, responsible AI use in GxP environments, risk management, and ongoing oversight of intelligent systems.

The curriculum is designed for individuals in quality, validation, regulatory affairs, information technology, clinical operations, and manufacturing. Unlike generic online learning platforms, it is developed by experienced practitioners who understand how regulatory expectations translate into day-to-day execution.

The Modern Assurance Program is now available to individual learners and organizations, either through a Compliance Group-hosted environment or via enterprise packages that may be deployed in a learning management system. Additional learning in data integrity, cybersecurity, digital quality, and other areas will be added as the CG Learning Academy roadmap expands.
