## Recognising the Businesses That Keep People and Goods Moving

The achievements recognised this year reflect the breadth of the haulage and logistics sector. They include integrated freight and customs services connecting customers with domestic and international markets, large-scale warehousing and distribution operations, secure airport supply chains, and carefully planned home moves supported by packing, storage and furniture-handling services. Across these different settings, responsive communication, reliable delivery and the ability to adapt services around customer needs remain central to success.

Investment in people and infrastructure is another strong theme. The recognised businesses

have developed apprenticeships and progression routes, supported employees in gaining HGV qualifications, introduced structured leadership training and expanded warehouse capacity. Technology is also strengthening service delivery through real-time vehicle tracking, end-to-end goods visibility, automated equipment and trials of autonomous handling systems.

The results also demonstrate the importance of safety, compliance and responsible growth. Rigorous vehicle checks, aviation security requirements, recognised quality standards and proactive risk management sit alongside investment in electric equipment, lower-emission fleets and more efficient transport operations. Business Awards UK congratulates all of the 2026 Haulage and Logistics Awards Winners and Finalists on their contribution to a sector that businesses, communities and households rely upon every day.
