

Jatheon Adds Slack to Connector Portfolio for Compliant Capture and Archiving

Jatheon announced Slack archiving on the Jatheon Cloud platform, giving compliance and legal teams a supervised, searchable record of Slack.

TORONTO, ONTARIO, CANADA, September 7, 2026 /EINPresswire.com/ -- The Slack connector extends Jatheon's data connector suite to one of the most widely used workplace messaging platforms. It's built for compliance officers, records managers, and IT leaders in regulated sectors and enterprise organizations worldwide.

The Slack connector captures activity across the platform and preserves it in evidentiary-quality format with metadata and message threading. Supported message types include public and private channels, direct messages, and group messages. Edits and deletions are also supported.

The connector also supports optional historical data import, so organizations can bring existing Slack conversations into the archive rather than starting from the deployment date. Once captured, Slack data is available through Jatheon's unified search across all data sources, in a single interface. Compliance teams can apply retention policies, legal holds, tags, content policies and audit trails to Slack records the same way they do for other channels. AI can decode message sentiment and flag risky and non-compliant items for review.

[Marko Dinic](#), Jatheon CEO, said in a statement: "Organizations face growing pressure to capture communications beyond email as employees move daily conversations into chat. Regulators have levied \$2.6 billion in fines for recordkeeping failures, underscoring the cost of incomplete records. Bringing Slack into the same archive as email and every other channel gives compliance,

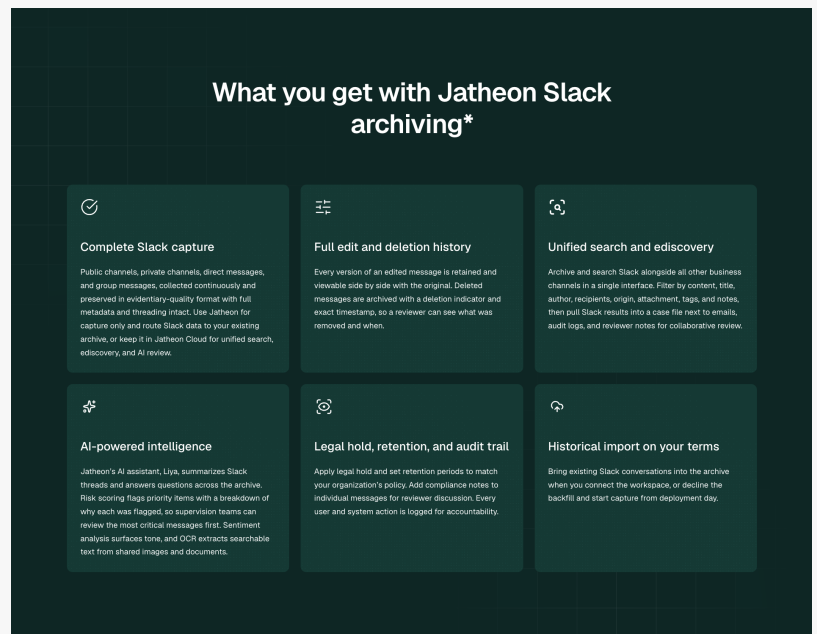

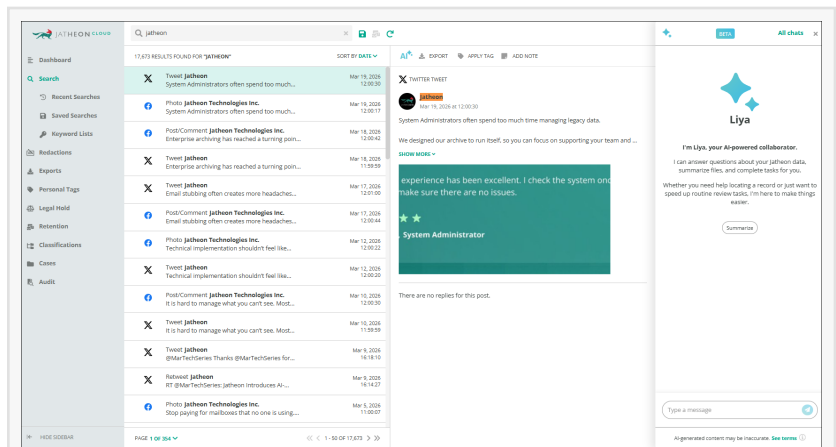

legal, and HR teams one place to search, review, and prove what happened, while staying compliant."

More information about Jattheon's full archiving connector suite, including the Slack connector, is available on the Jattheon's communications capture page.

ABOUT JATHEON

Since 2004, Jattheon has relentlessly focused on delivering an all-in-one data archiving solution that supports the widest array of use cases, communication channels and deployment options. Our solution mitigates risk, saves costs and improves visibility with advanced data retention, search/edisccovery, and supervision capabilities, all backed by world-class support. With analyst validation from Gartner®, Radicati, and InfoTech, Jattheon achieves 100% customer retention and is consistently ranked among the highest recommended archive solutions on the market.

Jattheon is headquartered in Toronto, Canada and serves clients worldwide through a wide network of global business partners. For more information, please visit www.jattheon.com.
