SBPSME Expands Microsoft AI Cloud Solutions for Small and Midsize Businesses in Grand Rapids, Michigan

SBPSME Expands Microsoft AI Cloud Solutions for Small and Midsize Businesses in Grand Rapids, Michigan

GRAND RAPIDS, MI, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- Small Business Partner LLC (SBPSME), a Michigan-based business advisory and technology company headquartered in Grand Rapids, is expanding its Microsoft-focused technology services to help small and midsize businesses across Grand Rapids and Michigan adopt artificial intelligence, cloud technology, cybersecurity and modern workplace solutions.

> Our goal is to help businesses understand what Microsoft technologies can actually do for their organization, identify the opportunities that matter most and implement solutions in a practical way..”
>
> *Adetunji Ojo, CEO of Small Business Partner LLC*

As businesses increasingly look to artificial intelligence and cloud technologies to improve productivity, strengthen security and compete in a rapidly changing economy, SBPSME is helping small and midsize organizations move from technology uncertainty to practical implementation.

Through its Strategic AI OEM practice, SBPSME works with businesses to identify where Microsoft technologies can create meaningful business value and develop practical strategies for adoption. The company’s Microsoft-focused capabilities span Microsoft 365 and Modern Work, Data and AI, Microsoft Copilot, cybersecurity, Power Platform, Azure cloud foundations, training and change management.

“Small businesses should not have to navigate the complexity of AI and cloud transformation alone,” said Adetunji Ojo, CEO of Small Business Partner LLC. “Our goal is to help businesses understand what Microsoft technologies can actually do for their organization, identify the opportunities that matter most and implement solutions in a practical way.”

Bringing Microsoft AI and Cloud Capabilities to Local Businesses

For many small and midsize businesses, the challenge is not access to technology. The challenge

is knowing which technology to adopt, how to implement it and how to ensure employees actually use it effectively.

SBPSME takes a business-first approach to Microsoft technology adoption, helping organizations evaluate their current operations and identify opportunities across productivity, artificial intelligence, cybersecurity, automation and cloud infrastructure.

Its Microsoft-focused services include:

SBPSME Expands Microsoft AI Cloud Solutions for Small and Midsize Businesses in Grand Rapids, Michigan

- Microsoft AI and Copilot: Helping organizations explore practical applications of AI and Copilot to improve productivity, knowledge management, customer engagement and business processes.
- Microsoft 365 and Modern Work: Supporting organizations with productivity, collaboration and workplace modernization using Microsoft technologies.
- Azure Cloud: Helping businesses establish and modernize cloud foundations as their technology and operational requirements grow.
- Cybersecurity: Helping organizations strengthen their security posture and protect users, systems and business data.
- Power Platform: Helping businesses automate repetitive processes and develop practical business applications.
- Training and Change Management: Helping employees understand, adopt and effectively use new Microsoft technologies.

A Microsoft-Focused Approach Designed for Small Business

SBPSME believes small and midsize businesses require a different approach to technology transformation.

Instead of beginning with a technology product, the company starts with the business challenge.

Whether a company wants to improve employee productivity, introduce AI into daily workflows,

strengthen cybersecurity, automate manual processes or move workloads to the cloud, SBPSME helps identify the appropriate Microsoft technologies and develop a practical path toward implementation.

The company's approach is built around helping businesses understand the technology before investing in it, ensuring that Microsoft solutions are connected to measurable business priorities.

Supporting Grand Rapids and Michigan Businesses

Based in Grand Rapids, Michigan, SBPSME is positioned to support businesses locally while extending its services to organizations across Michigan and the broader U.S. market.

The company is focused on making advanced technology more accessible to organizations that may not have large internal IT departments or dedicated AI teams.

"Grand Rapids has a growing and diverse business community, and many of these companies are looking for practical ways to use AI and modern cloud technology without taking on unnecessary complexity," said Ojo. "We want to be a trusted technology and advisory resource for those businesses as they navigate this transition."

Businesses interested in understanding how Microsoft AI, Microsoft 365, Azure, cybersecurity or business automation could support their organization can connect with SBPSME for an initial assessment and discussion of their technology priorities.
