

BlackVue Unveils ELITE 10 Cabin: World's First True Color 4K IR Dash Cam

Powered by Sony STARVIS 2 and OMNIVISION Nyxel®, the flagship dual 4K system delivers crystal-clear 24/7 surveillance inside and out.

CERRITOS, CA, UNITED STATES,
September 14, 2026 /

EINPresswire.com/ -- BlackVue, a global leader in premium dash cam technology, today announced the official launch of the ELITE 10 Cabin, a flagship dual-channel dash cam featuring the world's first True Color 4K Infrared (IR) interior camera.

Engineered for rideshare drivers, fleet operators, and safety-conscious car owners, the ELITE 10 Cabin provides simultaneous 4K UHD recording for both the road ahead and the vehicle interior.

Key Highlights of the ELITE 10 Cabin
World's First True Color 4K IR Cabin Camera: Powered by OMNIVISION sensor technology with Nyxel® NIR. Featuring Automatic IR Filter Switching, it captures natural, true-to-life 4K color inside the cabin during the day, and automatically switches to ultra-clean 4K infrared night vision in pitch darkness without disturbing passengers.

- 4K UHD Recording with Sony STARVIS

ELITE 10 Cabin at a glance

ELITE 10 Cabin 4K IR

2: The front camera integrates the Sony STARVIS 2 sensor with Front HDR, an F/1.7 aperture, an 8-layer lens, and a 146° wide field of view, ensuring crisp license plate capture even on poorly lit roads.

- 160° Ultra-Wide Cabin Field of View: The interior camera's F/2.2, 8-layer lens provides a 160° ultra-wide angle, eliminating interior blind spots and seamlessly recording rear-seat activities and side-window entries.
- Smart Parking Mode: Draws ultra-low power (under 1mA) in standby mode while triggering a 1-second instant wakeup recording upon impact. When paired with the BlackVue Ultra Battery, it offers long-term continuous protection for up to 12 months.
- Adaptive Format-Free Endless Loop Recording: the system optimizes microSD card usage efficiently and eliminates the need for manual formatting.

- Ultra-Fast Wi-Fi 5 & BlackVue Cloud Connectivity: Dual-band Wi-Fi (2.4GHz / 5GHz) allows high-speed video downloads, while BlackVue Cloud connectivity enables Remote Live View, real-time Event Push Alerts, and automatic Cloud backup.
