

forms.app Adds Authorize.net for In-Form Payments

forms.app users can now connect their Authorize.net account and collect card payments through their forms, with no commission taken by forms.app.

LONDON, LONDON, UNITED KINGDOM, September 8, 2026 /EINPresswire.com/ -- forms.app, an online form builder trusted by businesses, educators, and marketers worldwide, today announced support for Authorize.net as a payment method. Users who already run card processing through Authorize.net can now connect their account to a form in a few minutes and start taking payments without changing gateways, moving money around, or paying a cut.

The announcement image for forms.app's Authorize.net integration

With the addition of Authorize.net, users who sell products and collect payments with forms, can now offer the following payment methods: Stripe, PayPal, pay on delivery, bank transfer, and Authorize.net.

“

Online payments are more important than ever. It is the default. On forms.app, we are making it easier to collect payments, even without a website.”

*Vedat Koran, CEO of
forms.app*

Connecting an Authorize.net account with forms requires three easy steps:

1. Add a payment field to a form
2. Select Authorize.net as a payment method
3. Give the connected account a name and paste the required keys (which can be found on Authorize.net)

Once connected, a green indicator confirms the connection is live. Respondents pay by card without leaving the form. Form owners can run the whole thing through Testing mode first to confirm everything behaves as expected before going live.

Full setup instructions are available in forms.app's help center article on [how to accept payments via Authorize.net](#).

No commission from forms.app

forms.app does not take a percentage of collected payments on any plan, including the free one. Users pay only what their gateway charges them. That has been true since forms.app first shipped payment collection, and it holds for Authorize.net.

Combined with product listings, custom PDF generation, other payment methods, forms on forms.app becomes a full-fledged order flow, a donation page, a registration checkout, or a service booking with a deposit attached. All with no code.

About forms.app

forms.app is an online form builder designed for teams to create professional-looking forms and collect unlimited responses. Trusted by over 4 million users, forms.app offers free team collaboration, an AI form generator, a drag-and-drop editor, 5,000+ templates, conditional logic, custom PDF generation from responses, product listings and payment collection, e-signatures, and a wide range of native integrations. forms.app has a free forever plan with unlimited responses and unlimited team members, so you can start creating forms for free at:
