Dyad Heads to WSIA's Annual Marketplace With ALIS DX, Built for What MGAs Want to Grow Next

ALIS DX helps wholesalers and MGAs support new markets, programs, and premium growth with connected technology built for specialty insurance.

BREA, CA, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- Dyad, a provider of insurance management software for MGAs, wholesalers, program administrators, and specialty insurers, will showcase ALIS DX at the 2026 WSIA Annual Marketplace, October 11-14 in San Diego.

At an event built around creating new business relationships and opportunities, Dyad is bringing a simple question to MGA and wholesale leaders:

Is your technology ready for what you want to grow next?

> Growth creates opportunity, but it also puts pressure on technology and processes. ALIS DX gives MGAs and wholesalers a technology foundation that helps them capitalize on new opportunities."
>
> *Ryan Boswroth, Chief Sales Officer, Dyad*

New carrier relationships, programs, lines of business, and increasing submission volume can all create opportunities for premium growth. But they can also introduce more portals, manual processes, disconnected data, and operational complexity.

ALIS DX gives MGAs and wholesalers a connected technology foundation to manage that growth, bringing together submission intake, underwriting, quoting, policy administration, carrier transactions, accounting, reporting, automation, and embedded intelligence within one platform.

"Growth creates opportunity, but it also puts pressure on the technology and processes behind

the business," said Ryan Bosworth, Dyad's Chief Sales Officer. "The goal with ALIS DX is to give MGAs and wholesalers a technology foundation that helps them capitalize on new opportunities without creating more operational friction. Whether that means adding markets, increasing underwriting capacity, or supporting diverse premium growth, the technology has to be ready to keep up."

Carrier relationships create more value when teams can transact with those markets efficiently.

Through ACE-HUB, ALIS DX connects MGA and wholesale workflows directly with carrier markets, enabling electronic data exchange and supporting real-time quoting, binding, issuance, and other carrier transactions. Instead of moving between disconnected carrier portals and systems, users can bring more of that activity into the workflows where they already manage their business.

The result is technology designed to help organizations put market access to work faster and support new opportunities as their carrier strategy evolves.

Premium growth also creates more work upstream.

ALIS DX combines connected workflows, automation, and embedded AI to reduce the administrative work surrounding underwriting. Its AI Email Triage Agent can classify inbound submission emails and route them into the appropriate workflow, while AI Extractor converts information from incoming documents into structured data that can move directly into ALIS DX.

By reducing repetitive processing and rekeying, those capabilities are designed to give underwriting teams more capacity to evaluate, quote, and move business forward.

Growth does not stop at the underwriting desk. More submissions and written business ultimately create additional demands across policy administration, accounting, reporting, renewals, payments, and other operational functions.

ALIS DX brings those workflows together in a connected environment so MGAs and wholesalers can support new programs and growing books of business without continually adding disconnected systems and manual workarounds.

Recent investments across integrations, payments, accounting, automation, and AI continue to expand that foundation, giving customers more ways to connect and automate the processes surrounding the insurance lifecycle.

Technology that fuels premium growth is the story Dyad will bring to WSIA: technology built not simply to manage the business an organization writes today, but to support what it wants to grow next.

Meet With Dyad at WSIA Annual Marketplace
Dyad will be onsite at WSIA Annual Marketplace, October 11-14, 2026, in San Diego, meeting with MGAs, wholesalers, program administrators, and specialty insurance organizations.

Attendees can meet with the Dyad team to discuss the lines of business and growth priorities they are focused on, where existing technology may be creating friction, and how ALIS DX can provide the operational foundation to support what comes next.

Schedule time with Dyad at WSIA: https://info.dyadtech.com/alis-dx-wsia-2026

About Dyad
