

Pine Hosting Gears Up for Valheim 1.0 With High-Performance Servers

Longtime Valheim hosting provider prepares for the 1.0 launch with DDR5-powered servers, global locations, and new game-specific features.

NEW YORK, NY, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- As Valheim 1.0 approaches, Pine Hosting is preparing its established [Valheim server hosting](#) service for new and returning groups planning to explore the game together. Valheim servers offer an alternative for groups that want a persistent multiplayer world without relying on a single player to host it.

Valheim hosting is not new to Pine Hosting. The company has hosted Valheim for years and has deployed tens of thousands of game servers across its wider hosting platform. That experience includes managing game updates, performance requirements, common configuration issues, and modded servers.

For Valheim 1.0, Pine Hosting will continue to provide servers powered by high-performance hardware and [DDR5 RAM](#) across its global server locations. The company also maintains a 4.9/5 Trustpilot rating, with customer feedback frequently highlighting responsive support.

Why Use a Dedicated Server for Valheim 1.0?

Self-hosting Valheim remains a free and viable option, particularly for occasional multiplayer sessions. For groups that maintain the same world for weeks or months, however, dedicated Valheim server hosting eliminates the need for the original host's PC to remain online.

A persistent server allows individual players to join at their convenience to mine, gather resources, build, or progress independently. This can make it easier to coordinate an active group while keeping the shared world consistently available.

Pine Hosting Prepares New Features for Valheim Servers

Alongside its existing server management tools, Pine Hosting is developing additional Valheim-specific functionality, including a workshop and improved mod installer. Further details about these features are expected to be announced separately.

With Valheim 1.0 creating a new starting point for multiplayer groups, Pine Hosting is preparing

its existing hosting infrastructure for the release. Players can get a [Valheim 1.0 world](#) ready backed by global infrastructure, responsive support, and years of experience hosting Valheim servers.

About Pine Hosting:

Pine Hosting was founded to simplify game server hosting for users of all experience levels. Driven by a team of dedicated gamers, knowledgeable support staff, and experienced developers, Pine Hosting stands out for its attention to detail and exceptional customer service. Thanks to its focus on reliability, performance, and feature-rich offerings, the company has quickly become a favorite among first-time server owners and established networks. Pine Hosting provides clients with top-tier hosting solutions powered by high-performance hardware and premium network blends. The intuitive Pine Panel ensures a seamless hosting experience, making it the ideal choice for all hosting needs.
