

MINIX Launched the P140 Pro 140W 4-Port GaN Wall Charger With Smart Screen

HONG KONG, KOWLOON, HONG KONG, September 9, 2026

/EINPresswire.com/ -- For most technology enthusiasts and electronic product users, charging devices is boring. You plug them in, they deliver power, and you move on. But in 2026, there is an innovative technology enterprise — [MINIX](#), making charging devices more interesting and more visible with the P140 Pro, they launched the 140W 4-Port GaN Wall Charger with rotatable smart display screen. The [MINIX P140 Pro](#) emerges not just as a power supply, but as a smart power management hub. By combining the latest Gallium Nitride (GaN) technology, a massive 140W total output, and an industry-first rotatable smart screen, MINIX is redefining what users can expect from a wall charger.

The Screen Redefines Charging Experience

The most distinctive feature of MINIX P140 Pro is its integrated rotatable smart display screen. The screen displays real-time output, charging duration, and internal temperature—information that's genuinely useful for anyone who's ever wondered why their laptop is charging slower than expected.

The rotatable design is a thoughtful touch. Whether the charger is plugged vertically or horizontally, you can twist the screen to match your viewing angle. It's a small detail, but it's exactly the kind of human-centric engineering that sets MINIX apart from the faceless competition. If MINIX continues to iterate on this formula, they could carve out a genuine niche in a category that's long been defined by commoditization.

Next-Gen GaN Fast Charging Technology

Beneath the smart display screen, the MINIX P140 Pro is a workhorse.

Utilizing next-generation Gallium Nitride (GaN) technology, it delivers a total DC output of 140W in a chassis that measures just 65 x 62 x 34mm—small enough to slip into any backpack pocket without the bulk of traditional silicon-based chargers.

The port configuration is generous and well-considered:

- USB-C1/C2: Up to 140W (PD 3.1) – Enough to power a 16-inch MacBook Pro at full tilt
- USB-C3: Up to 65W (PD 3.0) – Ideal for ultrabooks or tablets
- USB-A1: Up to 22.5W (QC 3.0) – For legacy devices or accessories

Extensive Support Protocols

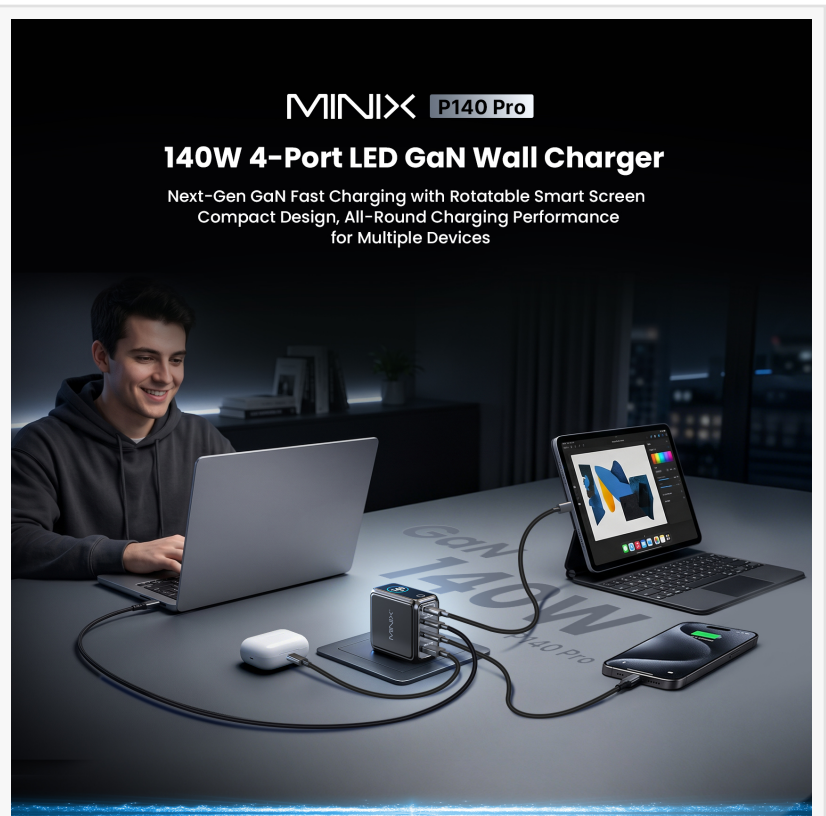

Compatibility is where the MINIX P140 Pro truly flexes. The charger supports an extensive roster of protocols including PPS, PD3.1, PD3.0, QC3.0, AFC, FCP, SCP, and even Apple 2.4A and Samsung 2A. This means it plays nicely with:

- Apple's ecosystem: iPhone 17 Pro Max, MacBook Pro, iPad Pro
- Samsung's flagship line: Galaxy S and Note series with Super Fast Charging 2.0
- Handheld gaming: Steam Deck, ROG Ally, Nintendo Switch
- Peripherals: Wireless earbuds, smartwatches, portable speakers

Who Needs MINIX P140 Pro?

- Tech Enthusiast

An early adopter who owns multiple high-drain devices, from the latest flagship smartphone to a

gaming handheld and a power-hungry ultrabook. Demands transparency—wants to see real-time wattage and charging speed, not just trust that it's working.

· Frequent Traveler

A business executive or consultant constantly on the move. Prioritizes portability, reliability, and universal plug compatibility. The enhanced wall grip and interchangeable international adapters are non-negotiable for hotel stays and airport lounges.

· Content Creator

A videographer, photographer, or streamer running resource-intensive laptops, external monitors, and peripherals. Needs consistent 140W power delivery to keep production gear running during long shoots or editing sessions.

· Multi-Device Household User

A parent or shared-space resident managing a mix of devices—laptops, tablets, phones, and gaming consoles—across different brands. The broad protocol support (PPS/PD3.1/QC3.0/SCP/AFC) ensures compatibility without juggling multiple branded chargers.

About MINIX:

MINIX is a worldwide innovative technology brand for high performance products from HONG KONG. With a commitment to innovation and user-centric design, MINIX delivers robust, future-ready products for the global market. Now the MINIX P140 Pro is available on MINIX official website.
